This book identifies accumulated environmental, social and economic effects of oil and gas leasing, exploration, and production on Alaska's North Slope. Economic benefits to the region have been accompanied by effects of the*

roads, infrastructure and activities of oil and gas production on the terrain, plants, animals and peoples of the North Slope. While attempts by the oil industry and regulatory agencies have reduced many of the environmental effects, they have not been eliminated. The book makes recommendations for further environmental research related to environmental effects.

YFM660R Read James Wesley, Rawles's posts on the Penguin Blog In the vein of Sam Sheridan's *The Disaster Diaries*, a comprehensive guide to preparing for the apocalypse! With the recent economic crisis, formerly unimaginable scenarios have become terrifyingly real possibilities- learn how to prepare for the worst Global financial collapse, a terrorist attack, a natural catastrophe-all it takes is one event to disrupt our way of life. We could find ourselves facing myriad serious problems from massive unemployment to a food shortage to an infrastructure failure that cuts off our power or water supply. If something terrible happens, we won't be able to rely on the government or our communities. We'll have to take care of ourselves. In *How to Survive the End of the World as We Know It*, James Rawles, founder of [SurvivalBlog.com](http://SurvivalBlog.com), clearly explains everything you need to know to protect yourself and your family in the event of a disaster-from radical currency devaluation to a nuclear threat to a hurricane. Rawles shares essential tactics and techniques for surviving completely on your own, including how much food is enough, how to filter rainwater, how to protect your money, which seeds to buy for your garden, why goats are a smart choice for livestock, and how to secure your home. It's the ultimate guide to total preparedness and self-reliance in a time of need. A 25-year-old backcountry wanderer, a man happiest exploring wild places with his dog, Dan Bigley woke up one midsummer morning to a day full of promise. Before it was over, after a stellar day of salmon fishing along Alaska's Kenai and Russian rivers, a grizzly came tearing around a corner in the trail. Dan barely had time for "bear charging" to register before it had him on the ground, altering his life forever. "Upper nose, eyes, forehead anatomy unrecognizable," as the medevac report put it. Until then, one thing after another had fallen into place in Dan's life. He had a

job he loved taking troubled kids on outdoor excursions. He had just bought a cabin high in the Chugach Mountains with a view that went on forever. He was newly in love. After a year of being intrigued by a woman named Amber, they had just spent their first night together. All of this was shattered by the mauling that nearly killed him, that left him blind and disfigured. Facing paralyzing pain and inconceivable loss, Dan was in no shape to be in a relationship. He and Amber let each other go. Five surgeries later, partway into his long healing journey, they found their way back to each other. The couple's unforgettable story is one of courage, tenacious will, and the power of love to lead the way out of darkness. Dan Bigley's triumph over tragedy is a testament to the ability of the human spirit to overcome physical and emotional devastation, to choose not just to live, but to live fully. Visit Dan Bigley's site or *Beyond the Bear*. Haynes manuals are written specifically for the do-it-yourselfer, yet are complete enough to be used by professional mechanics. Since 1960 Haynes has produced manuals written from hands-on experience based on a vehicle teardown with hundreds of photos and illustrations, making Haynes the world leader in automotive repair information. "Christopher W. Merritt combines and highlights the historical and archaeological records of the Overseas Chinese experience in Montana, beginning with the arrival of Chinese immigrants in 1862 to the repeal of the Chinese Exclusion Act in 1943."--Provided by publisher. YFM660F Grizzly 660 (2002-2008) Suzuki GSX-R600 & GSX-R750, 2006-2009 Haynes disassembles every subject vehicle and documents every step with thorough instructions and clear photos. Haynes repair manuals are used by the pros, but written for the do-it-yourselfer. The story of what happened to six major species of the Great Plains--pronghorn antelope, gray wolves, bison, coyotes, wild horses, and grizzly bears--in the 19th and 20th centuries, and the prospects for recovering North America's "Serengeti" in our time by re-creating a great Plains wilderness on a Yellowstone-sized scale. The book is thus the story of plains slaughterhouse history in the 19th century and large-scale conservation hopes for the 21st. Popular Mechanics inspires, instructs and influences readers to
