Created by world-renowned programming instructors Paul and Harvey Deitel, *Visual Basic 2008 How to Program, Fourth Edition* introduces all facets of the Visual Basic 2008 language hands-on, through hundreds of working programs. This book has been thoroughly updated to reflect the major innovations Microsoft has incorporated in Visual Basic 2008 and .NET 3.5; all discussions and sample code have been carefully audited against the newest Visual Basic language specification. The many new platform features covered in depth in this edition include: LINQ data queries, Windows Presentation Foundation (WPF), ASP.NET Ajax and the Microsoft Ajax Library, Silverlight-based rich Internet application development, and creating Web services with Windows Communication Foundation (WCF). New language features introduced in this edition: object anonymous types, object initializers, implicitly typed local variables and arrays, delegates, lambda expressions, and extension methods. A series of appendices provide essential programming reference material on topics ranging from number systems to the Visual Studio Debugger, UML 2 to Unicode and ASCII.

**AUDIENCE:** Appropriate for anyone interested in learning programming with Visual

Basic 2008. Born in the projects of Spanish Harlem to a disabled mother and an abusive father, Steve DeMasco spent most of his childhood lost and angry. Drifting from one job to another, he stalked the streets as a troubled youth, barely surviving while all of his peers were either dead or in jail, until he found himself on the steps of the Shaolin Temple. Originating more than 1,500 years ago in ancient China, the Shaolin monks were simple farmers and worshippers of Buddhism who learned to protect themselves from the constant danger of bandits and overlords with a kind of "meditation in motion," a nonlethal form of self-defense that didn't violate their vows of peace. As their legend grew, they became known as the Shaolin Fighting Monks, revered across the land for their spiritual dedication, enlightened message, and amazing fighting skills. DeMasco entered the Shaolin Temple to battle the demons of his past. But he got more than he bargained for. Besides learning how to wield weapons and take on multiple attackers at once, he discovered an ancient philosophy that helped melt away preconceived notions of the world, and gave him a powerful platform on which to live and grow. In *The Shaolin Way*, he adapts these teachings for the modern world, singling out ten secrets of survival that can help anyone live a more fulfilled life.

Many of these emerge as "anti-truth claims" and slogans we are all familiar with: • Why not just look out for yourself? • Do what you want--just as long as you don't hurt anyone • Miracles violate the laws of nature • Aren't people born gay? Paul Copan has been answering questions like these for many years. In *When God Goes to Starbucks*, he offers readers solid and caring Christian responses to these and many other concerns that are being discussed in Starbucks, shopping malls, youth groups, and schools. Each chapter provides succinct answers and points for countering the cultural questions believers are faced with today.
