Godzilla Stuffed into a Briefcase Columbus takes a vacation to The Bahamas, and discovers the area to be a fun place. He tells all his other adventurous friends about it, and they decide they all need vacations, too. Soon everybody in The Old Country is loading up enough beer to make the trip and sailing to The Bahamas. Hysterical events have surprised us, inventions have made us more comfortable, and recreational pursuits have all but dominated our lives. The story of America is told in a pair of Jekyll & Hyde Timelines. You will meet the good doctor inside. His mean, ugly brother will arrive in 2008. This is a lot more than a pop culture trivia book, although no simpler phrase describes it. Ten timelines tell the story of America's development from the arrival of Columbus to the homeruns of Barry Bonds and the movie release of The Da Vinci Code. The story is separated into ten topics: events, comforts, cars, toys, movies, television, music, nerds, sports, and gossip. Like any competent trivia book, there is a test at the end, but this tale is about the quest, not the grail. This is a capsule history of the things that have defined us, and Godzilla doesn't like being so tightly restrained. 106 pages, 51 black & white illustrations, size 5.5 x 8.5 inches. Cadillac has had a long history in the automotive marketplace as General Motors' luxury car division. During the 1980s, Cadillac's management wanted to reestablish the brand as a leader in sophistication, innovation, refinement and prestige. Engineers conceived a new dual-overhead cam, four-valve-per-cylinder V-8 engine—the Northstar. This power plant was the heart of Cadillac's Northstar System, which included a greatly improved suspension and braking system. The division redesigned its entire line to incorporate these new technologies for the 1990s and beyond. The Northstar was the last engine designed and built by Cadillac before the 2005 establishment of GM Powertrain, which took over engine design for all GM divisions. This history of the Northstar V-8 and the cars it powered covers the first generation front-wheel drive Northstar, the second generation rear-wheel drive model, and the supercharged version, along with racing history and the most collectible Northstar-powered Cadillacs. This beautiful book is the foremost account of the history of Honda. The result of \$3,200 and a dream in 1948, The Honda Motor Company has become synonymous with innovation and quality and leads the world in motorcycle technology. Sir John Franklin's Arctic expedition departed England in 1845 with two Royal Navy bomb vessels, 129 men and three years' worth of provisions. None were seen again until nearly a decade later, when their bleached bones, broken instruments, books, papers and personal effects began to be recovered on Canada's King William Island. These relics have since had a life of their own--photographed, analyzed, cataloged and displayed in glass cases in London. This book gives a definitive history of their preservation and exhibition from the Victorian era to the present, richly illustrated with period engravings and photographs, many never before published. Appendices provide the first comprehensive accounting of all expedition relics recovered prior to the 2014 discovery of Franklin's ship HMS Erebus. *DIV*In Café Racers, master photographer Michael Lichter and motorcycle culture expert Paul d'Orléans visually trace café racer motorcycles from their origins in the mid-twentieth century all the way into modern times. /div 106 pages, 68 black & white illustrations, size 5.5 x 8.5 inches.
