This book presents everything needed to design and implement daily behavior report cards (DRCs), a flexible and dynamic system for promoting positive student behaviors and overcoming barriers to learning. DRCs offer a way to reward K-12 students for achieving clearly defined goals while building school-home collaboration. Teachers can implement the authors' evidence-based approach in just minutes a day, and it is fully compatible with multi-tiered systems of support. In a large-size format with lay-flat binding for easy photocopying, the book includes helpful reproducible forms. Purchasers get access to a companion Web page featuring printable copies of the reproducible materials plus additional useful tools for charting student progress. This book is in The Guilford Practical Intervention in the Schools Series. Fearing that her report card will not contain good news, Isabel tries to devise a way to hide it from her parents. Author John Shtino's near-death experience moved him to try to get several projects left hanging completed. Life's Report Card: The Trying Game is one of them. He believes that most talents are inherited with the recipient either using or squandering their talent. Many of his poems deal with love lost, mental illness, compulsive gambling, philosophy and chances not taken (the what ifs of life). In Dear Son, he writes I hope ... that roads not traveled do not haunt you. --iUniverse, Inc. The contributors tell their own stories, presenting and describing some of the authentic assessment and reporting strategies they have devised and are using in their classrooms. Narratives, developmental continuums, and indicators of progress are all explored. Strategies focus on home and school collaboration, student self-assessment, the technology for developing report forms, and more. Throughout the book, abundant examples and samples of student work show ways to bring curriculum, outcomes, and progress reports together. REVIEW

AUTHOR BIO The use of government-mandated report cards to diminish uncertainty about the quality of products and services is widespread. However, report cards will have little effect if they simply confirm consumers' prior beliefs. Moreover, documented responses to report cards may reflect learning about quality that would have occurred in their absence (quot;market-based learningquot;). Using panel data on Medicare HMO market shares between 1994 and 2002, we examine the relationship between enrollment and quality before and after report cards were mailed to 40 million Medicare beneficiaries in 1999 and 2000. We find evidence that consumers learn from both public report cards and market-based sources, with the latter having a larger impact during our study period. Consumers are especially sensitive to both sources of information when the variance in HMO quality is greater. The effect of report cards is driven by beneficiaries' responses to consumer satisfaction scores; other reported quality measures such as the mammography rate did not affect enrollment decisions. The magazine that helps career moms balance their personal and professional lives. This book is about building craft for space travel a space travel that is not in the distant future but in the immediate future. There is no question that we have the technology to build and power large craft capable of traversing the galaxy, and for now, this book will focus on achieving the goal of intragalactic travel. We will describe various methods of power generation and propulsion, delineate the materials and technology for construction, discuss the building of the spacecraft from the outside in, and show what is required to sustain life on the craft for extended periods of time. While we will go into some detail on each of these, pointing out advantages and disadvantages to components and methods, this is not, nor is it intended to be, a highly technical book to be used by specialists. Rather it is intended to inform the general readership about what is possible, and perhaps what is not, in building and operating spacecraft for long-distance and long-duration travel with current and available means. Report cards are the result of market pressure for greater accountability in managed care. The intent behind them is to help consumers make wiser purchasing decisions. Report card initiatives originated with health plans, but it is fast becoming apparent that consumers believe quality measurement should extend to health providers--hospitals, home care agencies, long term care facilities, and doctors. This book prepares providers to meet the challenges of public-oriented report cards. Readers will learn what the public wants to know about the quality of their providers, how to display performance data in a manner that can be easily understood by the public, techniques for improving dissemination of performance information, strategies for minimizing product liability concerns, and methods for gathering performance data in various provider sites. Providing a clear framework, this volume helps school leaders align assessment and reporting practices with standards-based education and develop more detailed reports of children's learning and progress. Whatever his/her feeling about grades, nearly every teacher must give them. That's the rationale behind this straightforward text--helping prospective teachers to understand grading and learn to do it well. Grading, Second Edition continues to be the resource staying true to its original intent--to help current and future teachers begin to see themselves as competent graders. The text focuses on explaining how grades function in schools and schooling, and on developing skills in grading work and creating report cards. Based on current research and informed by the author's experience, the text is replete with detailed explanations, stories and illustrations, student work samples, sample report cards and other school artifacts, and references for further study. Readers will be introduced to the historical, social, legal, and psychological contexts of grading, and will obtain the necessary content and practice on how to grade individual units of student work and techniques for turning discrete grades into report-card marks. Every major section of the book concludes with a more comprehensive assignment that will help readers assess their knowledge of the major concepts and applications recently studied. Every chapter ends with a set of questions or exercises that serve as a self-assessment tools and a means to practice skill development. Organized into three major parts (Understanding Grading, Integrating Assessment and Instruction, and Combining Grades Into Marks for Report Cards), with the added encouragement of self-reflection at the onset and throughout, Grading, Second Edition fully prepares current teachers and those working toward that goal to refine and perfect a simple, yet compelling function in the process of school, grading. Grading, Second Edition is a perfect supplement for pre-service and current teachers, and for use in General K 12 Methods courses and courses in Tests and Measurements. Report cards for Nellie Harrington ranging from third grade to high school. Implement standards-based grading practices that accurately and equitably report student achievement! Standards-based education poses a variety of challenges for grading and reporting practices. This edited volume examines critical issues in standards-based grading and provides specific suggestions for improving policies and practices at the school and classroom levels. The chapters: Describe traditional school

practices that inhibit the implementation of standards-based grading Address how teachers can assign fair and accurate grades to English language learners and students with special needs Examine legal issues related to grading Discuss why report card grades and large-scale assessment scores may vary Offer communication strategies with parents Nora Rose Rowley is a genius, but don't tell anyone. Nora's managed to make it to the fifth grade without anyone figuring out that she's not just an ordinary kid, and she wants to keep it that way. But then Nora gets fed up with the importance everyone attaches to test scores and grades, and she purposely brings home a terrible report card just to prove a point. Suddenly the attention she's successfully avoided all her life is focused on her, and her secret is out. And that's when things start to get really complicated.... This book was written for every parent who has ever struggled with that uneasy, anxious, apprehensive gut feeling. You are convinced something is wrong or perhaps different with your child but you just can't put your finger on it. You talk to teachers, administrators, anyone who will listen. They suggest this or tell you to do that. You know deep down inside that it probably isn't the solution, but you are not the expert, so you do what you are told. Slowly, the school year goes by, then the next and the next and nothing changes. Sometimes you start to feel like you are going crazy, that you are obsessing. This book is for any parent, who has lost hope, to know that you are not alone. It is for the parent who needs to ask questions, but does not know where to find answers. Most of all, I hope, through our story, some parents will feel empowered enough to fight for their child, no matter what it takes, without fear of retribution, from their school system. You are your child's best advocate. You need to speak up! Whatever issues you might be having with your child, there is something in our story for everyone. Included are actual emails, transcripts and more. I want to share the pain, the fear, the joy, the mind-boggling, unbelievable stories that may seem absurdly unREAL! Thoughtful and constructive report card comments can improve parent-teacher communication and student performance. Each book features hundreds of ready-to-use comments in a variety of specific areas in academic performance and personal development. General messages are also included, as well as a robust list of helpful words and phrases. Having written a scathing essay about her disgust with the government's standardized testing process, Jainey skips her final weeks of high school, while part-time test scorer Charlie reads Jainey's essay and recognizes her as a person needing help. To better serve the whole child, look at the whole report card. Although parents and teachers spend more time in conferences talking about behavior than they do about rubrics and test scores, too many teachers are still guessing when it comes to using outdated behavior ratings and comments to describe the whole child. With this book, you'll take report cards to the next level, integrating social-emotional learning and character development into any grading system. Resources include Guided exercises for analyzing existing report cards Suggested report card designs Tips on improving teacher-parent communication Case studies Testimonials from teachers and students In recent years, consumers, professional organizations, government officials, and third-party payers have become increasingly concerned about how to assess the quality of the services provided by organizations in both the private and the public sectors. One new approach is the organizational report card, which compares the performance of organizations such as public schools, colleges, hospitals, and HMOs. This book offers the first comprehensive study of such instruments. It discusses the circumstances under which they are desirable alternatives to other policy instruments, such as regulation; how they should be designed; who is likely to use them and for what purpose; and what role, if any, government should have in their creation. Informed by cases drawn from education, health, and other policy areas, this book develops a conceptual framework for analyzing these issues. It explores the tradeoffs in measuring performance, the methods of communicating results effectively to mass and elite audiences, and the ways in which organizations respond to the data gathered. The U.S. Government Accountability Office (GAO) is an independent agency that works for Congress. The GAO watches over Congress, and investigates how the federal government spends taxpayers dollars. The Comptroller General of the United States is the leader of the GAO, and is appointed to a 15-year term by the U.S. President. The GAO wants to support Congress, while at the same time doing right by the citizens of the United States. They audit, investigate, perform analyses, issue legal decisions and report anything that the government is doing. This is one of their reports. The magazine that helps career moms balance their personal and professional lives. This third edition of our best-selling resource makes it easy to add a personal touch to each child's report card, and to establish positive and effective interaction between home and school. Revised with updated messages for a wide variety of classroom and playground situations, the messages are sorted by topic and are easy to adapt to other communications with parents. It features an easy 6 x 9" take-home size and includes 48 pages. Find the right words for report cards, parent-teacher conferences, and more Written for teachers grades K through 12, Perfect Phrases for Classroom Teachers helps you find the right words that will communicate a student's progress effectively and reveal his or her weaknesses without sounding negative. This book provides lists of words and phrases that convey difficult messages tactfully and with appropriate professionalism, and words and phrases that follow state standards and guidelines for permanent records.
