New required text for the FAP Modules, as of January 31, 2012. A critical point in an actuary's education is the transition from understanding the mathematical underpinnings of actuarial science to putting them into practice. The problems become less well-defined and the solutions less clear-cut. Understanding Actuarial Practice is designed to aid that transition in four of the areas in which actuaries practice: investments, life insurance and annuities, retirement benefits, and health insurance. In each area students are introduced to the products that are delivered in each area and the relevant methods with regard to pricing, reserving and funding. Examples are supported by readily available spreadsheets and there are numerous exercises that reinforce the concepts. While written expressly for use in the Society of Actuaries Fundamentals of Actuarial Practice Course, this book is a valuable resource for anyone who desires to learn how actuarial principles are put into practice. Praise for The WorldatWork Handbook of Compensation, Benefits & Total Rewards This is the definitive guide to compensation and benefits for modern HR professionals who must attract, motivate, and retain quality employees. Coverage includes: Why the total rewards strategy works Developing the components of a total rewards program Common ways a total rewards program can go wrong Designing and implementing a total rewards program Communicating the total rewards vision Developing a compensation philosophy and package FLSA and other laws that affect compensation Determining and setting competitive salary levels And much more This Detailed Assessment Report focuses on Anti-Money Laundering and Combating the Financing of Terrorism (AML/CFT) for Thailand. The report discusses that Thailand has a legal framework in the Anti-Money Laundering Act 1999 (AMLA) around which the core elements of its AML/CFT regime are established. The AMLA criminalizes money laundering by reference to eight predicate offenses and establishes the Anti-Money Laundering Office (AMLO) as Thailand's financial intelligence unit. It imposes some customer due diligence obligations on a wide range of financial institutions (FIs) and requires these FIs to report transactions to the AMLO. This publication reviews recent developments on the performance of enterprises in attaining Sustainable Development Goals, as well as practical implementation of aspects concerning International Financial Reporting Standards (IFRS) and International Public Sector Accounting Standards (IPSAS). It discusses implementation of recent IFRS considerations dealing with financial instruments, revenue from contracts with customers, leases and insurance contracts. Concerning IPSAS, the report looks into its overall implementation worldwide. The IMF Fiscal Affairs Department's Revenue Administration Gap Analysis Program (RA-GAP) aims to provide a quantitative analysis of the tax gap between potential revenues and actual collections, and this technical note explains the concept of the tax gap for corporate income tax (CIT), and the methodology to estimate CIT gaps. It includes detailed steps to derive the potential CIT base and liability with careful consideration for the theoretical differences between the coverage of statistical macroeconomic data and the actual tax base of CIT, and then compare the estimated results with actual declarations and revenues. Although the estimated gaps following the approach will have margins of errors, it has the advantage of using available data without additional costs of collection and suits initial evaluations of overall CIT noncompliance in a country. This Financial System Stability Assessment paper on Thailand highlights that assets of the insurance and mutual fund sectors have doubled as a share of gross domestic product over the last decade, and capital markets are largely on par with regional peers. The report discusses significant slowdown in China and advanced economies, a sharp rise in risk premia, and entrenched low inflation would adversely impact the financial system. Stress tests results suggest that the banking sector is resilient to severe shocks and that systemic and contagion risks stemming from interlinkages are limited. Financial system oversight is generally strong, but the operational independence of supervisory agencies can be strengthened further. The operational independence of supervisory agencies can be strengthened further by reducing the involvement of the Ministry of Finance in prudential issues and ensuring that each agency has full control over decisions that lie within its areas of responsibility.

This Detailed Assessment of Observance on Insurance Core Principles on Thailand discusses that the government of Thailand has made a concerted effort to develop the insurance sector. The government has implemented a series of insurance development plans toward this end. Some significant regulatory and supervisory challenges remain, however, if Thailand is to continue to meet the pressures of a changing market and to continue to build the trust on which future growth depends. Consideration should be given to vesting more supervisory authority for key supervisory decisions with the Commission rather than with the Minister and Cabinet. Vesting authority with the Commission will help to ensure that the insurance supervisor has adequate powers to meet the objectives of insurance supervision. With respect to winding up and exit from the market, the insurance legislation should be amended to clearly establish a point at which it is no longer permissible for a troubled insurer to continue in business. Since the earliest years of its development, Functional Analytic Psychotherapy (FAP) has been hailed for its clinical innovation and transformative power with clients across the range of disorders. Building on the foundations of their earlier volumes about this versatile therapy, the editors of The Practice of Functional Analytic Psychotherapy bring together noted clinicians and researchers to explain in depth how FAP can be used in conjunction with a broad spectrum of therapeutic approaches, and with diverse client populations. The hallmarks of the method, including therapist sensitivity and responding to client behavior in the moment, courage, mindfulness, acceptance, and egalitarianism, inform a wide array of interventions and strategies, among them: Integrating FAP with other treatments, including cognitive behavioral therapy, acceptance and commitment therapy, dialectical behavior therapy, behavioral activation, psychodynamic therapies, and feminist therapies. Applying FAP across cultures, nationalities, and ethnicities. Employing FAP with couples. Increasing sensitivity to and effectiveness with sexual minority clients. Modifying FAP for developmentally appropriate use with adolescents. Enhancing a team approach with severely mentally ill patients in institutional settings. Strengthening the power of interpersonal process groups. As a new tool or an enhancement to current practice, these applications of FAP will give therapists an empowering complement to their work. The Practice of Functional Analytic Psychotherapy points to compelling directions in personal growth and change—on both sides of the therapeutic bond. How can I supercharge the therapy I currently use? This volume distils the core principles, methods, and vision of the approach. Each Functional Analytic Psychotherapy (FAP) principle is presented in terms of its intended purpose and is clearly linked to the underlying theory, thus providing clinicians with a straightforward guide for when and how to apply each technique. FAP embraces awareness, courage, and love as integral to the treatment process. Part I of this volume reviews the history of FAP and the basic behavioral principles on which it is based. Part II provides an easy to use step-by-step guide to the application of FAP techniques. FAP is an approach undergoing a renaissance, and this volume uniquely summarizes the full history, theory, and techniques of FAP, resulting in a handbook perfect for clinicians and graduate students with or without a behavioural background.
