This book is intended for students taking the current SAT test before March 2016. 15 Skills that will change how you tackle SAT passage based reading questions. This short book explains how to read the passage and how to manage the answer choices quickly and efficiently. Mr. Gouda has developed these skills over 13 years of preparing students all over the world for their SAT tests. After using these skills with over 2000 students, Mr. Gouda knows they work. Each skill is explained in details then is followed by an example. Finally, after the example you will find a reference to an example from The Official SAT Study Guide 2nd Edition for more clarification. Understanding the skills won't take time but practicing using them effectively will.... so start now. Here's an example of one of the skills in this book: SKILL 13. OPPOSITES When you compare answer choices keep an eye out for opposite words. Answer choices that have words that are opposite of each other are very good candidates for the correct answer. Example on Skill 13: Take a look at the example below (without a citation). 12. The author characterizes the "propaganda" in line 9 as having (A) failed because of the lack of knowledge about Picasso (B) showed the negative effects of commercial art (C) helped clarify the value of modern artistic expression (D) solved the problem caused by the issue (E) failed to increase the artwork's monetary value Choices A and E have the word "failed" while choice D has the opposite word "solved." This means that the correct answer is probably A, D, or E. Using other skills (like Skill 14) will further narrow down your choices. Let's take an example from the Official SAT Study Guide P. 403 question number 11. This is a difficult pair (of passages). Compare the answer choices. After a close look, you can see that choices C and E have Opposites. Where? Choice C says, "a characteristic of Thoreau's..." which means that it is typical of Thoreau. Choice E says, "atypical of Thoreau's..." Atypical is the opposite of typical. This means that choices C and E are strong candidates for the correct answer. The answer is indeed one of them, E. The information was drawn from many sources and includes latest research data available on types of storage facilities and equipment needed for handling and storing foods. It is recognized that not all schools and institutions have the ideal types of storeroom facilities and handling equipment. However, this should present a challenge and inspire constant attention to improving existing facilities and planning for adequate food storage facilities in the future. In using the guide, consider the geographic location of the storage facilities, giving particular attention to climatic conditions and other local situations prevailing in the area. The terms dry food storage or storeroom used in this handbook apply to any dry food storage facility maintained by schools and institutions where foods are received and stored until they are prepared and served. The term refrigerated food storage applies to both normal refrigeration and freezer or frozen food storage. Good storage facilities - both dry and refrigerated - help keep foods safe, wholesome, and appetizing. Meals taste better, and are better nutritionally, if all foods used to prepare them are at the peak of quality. Careful menu planning, good buying practices, and good storage all help to provide well-balanced meals at reasonable prices. Night Shyamalan seemed to have it all. He'd directed a string of hit movies for Disney, beginning with the supernatural thriller The Sixth Sense, which had brought in over two billion dollars around the world. He had a beautiful wife, a loving family, a house with its own theater - the whole thing. People

were calling him "the next Spielberg." Then he wrote a screenplay called Lady in the Water." "It was a fairy tale, really, an adaptation of a bedtime story he had invented for his young daughters. But when the bosses at Disney read the script, they told him they "didn't get it." Night felt he knew what they were really thinking: This guy has lost his mind. He boldly decided to leave the safety of his longtime filmmaking home and find new partners who would understand his odd story and idiosyncratic self. Night needed people who would help him make the most daring, ambitious, and deeply personal picture of his life." "He had panic attacks all along - while writing, while casting, while directing. For his hero, he didn't want a proven box-office star like Tom Hanks or Tom Cruise, but the brilliant but lesser-known Paul Giamatti. He wanted Lady filmed in a lush style by a wild man cinematographer that no director had ever tamed. And he wanted the movie to open on seven thousand screens across the world at the height of the summer popcorn season." "In The Man Who Heard Voices, Michael Bamberger takes you deep into Night's world during the creation of Lady in the Water. Based on nearly two years of exclusive, intimate reporting, Bamberger's book takes the cover off the secretive director's inspiring methods: handpicking a cast and crew he can mold into a temporary family; weighing on-the-set choices that will define his movie forever; and leading, even when he's lost. Most important, Bamberger penetrates the mind and artistic vision of a creative genius working at the peak of his powers, driven to bring his vision to the screen by the voices of creation - and self-doubt - that forever haunt him."--
