HER ONLY OPTION IS DEATH Sue Quentin has reached the end of her rope—she's desperate, and there's only one way out. Her plan doesn't include falling for Tony, the mysterious hit man she hires. He listens when she speaks and somehow convinces her that maybe her problems aren't entirely insurmountable. He even thinks her little potbelly is sexy. So he's a werewolf—everyone has flaws! Sue enjoys being coddled by Tony, and, for his part, Tony likes the way Sue moans when he touches her. She begins to think she and Tony might have a shot at a future together, despite his unorthodox profession . . . and even though she doesn't know his real name. But

when Tony's enemies—not all of whom are fully human—decide Sue makes a perfect target, will Tony risk letting his darker side out during the day to save her? Mathews uses a limited definition of paranormal, and examines works set, for the most part, in a relatively realistic modern world inhabited by both humans and paranormal beings. The *Initiation of DNA Replication* contains the proceedings of the 1981 ICN-UCLA Symposia on *Structure and DNA-Protein Interactions of Replication Origins*, held in Salt Lake City, Utah on March 8-13, 1981. The papers explore the initiation of DNA replication and address relevant topics such as whether there are specific protein recognition sites within an origin; how many proteins interact at an origin and whether they interact in a specific temporal sequence; or whether origins can be subdivided into distinct functional domains. The specific biochemical steps in DNA chain initiation and how they are catalyzed are also discussed. This book is organized into six sections and comprised of 41 chapters. The discussion begins by analyzing the replication origin region of the *Escherichia coli* chromosome and the precise location of the region carrying autonomous replicating function. A genetic map of the replication and incompatibility regions of the resistance plasmids R100 and R1 is described, and several gene products produced *in vivo* or *in vitro* from the replication region are considered. The sections that follow focus on the DNA initiation determinants of bacteriophage M13 and of chimeric derivatives carrying foreign replication determinants; suppressor loci in *E. coli*; and enzymes and proteins involved in initiation of phage

and bacterial chromosomes. The final chapters examine the origins of eukaryotic replication. This book will be of interest to scientists, students, and researchers in fields ranging from microbiology and molecular biology to biochemistry, molecular genetics, and physiology. From a "USA Today"-bestselling author comes the second book in a contemporary urban fantasy that features the alluring half-vampire, Celia Graves. Bodyguard Celia Graves has survived a vampire attack which made her a half-vampire and awakened her latent Siren abilities. Celia's hellish recent experiences have given her the unique combination of abilities needed to overcome a childhood curse and to close an ancient rift between the demonic dimension and our own. An ifrit tries to take over Celia Graves's body so he can free thousands of evil djinn to plague mankind in Cat Adams's *All Your Wishes*. A client begs Celia Graves—part human, part Siren, part vampire—to help return a genie to his bottle. The attempt makes Celia a target for the currently incorporeal ifrit. If she doesn't give him her body, he'll kill everyone she loves. If she does, he'll use her physical form to free thousands of evil djinn. Celia's not going to hand over her body, but her client tries to trick her into it—so that he can kill the ifrit while it's trapped in her flesh. That doesn't end well for the client. Celia might not get paid for the gig, but she's got to get the ifrit re-bottled before all hell breaks loose—possibly literally! Now written solely by C. T. Adams under the Cat Adams name, *All Your Wishes* continues the outstanding urban fantasy series *Blood Singer* with a thrilling new adventure. At the Publisher's request,

In Cathy Clamp's Illicit, when a border dispute between two bear clans destabilizes shapeshifter relations throughout Europe and threatens to reveal their existence to humans, the Sazi High Council orders both sides to the negotiation table. The peace talks take place in Luna Lake, the American community where all shifter species--wolf, cat, bird, bear, and more--live in harmony. Diplomats, their families, and security personnel stream into town, among them Dalvin Adway, a Wolven agent. Dalvin is startled to find Rachel Washington in Luna Lake. The last time he saw her, they were children in Detroit. Then she was kidnapped and, he thought, murdered. But Rachel became an owl-shifter as a result of the attack and has avoided family and old friends ever since, knowing they would not understand her. She's stunned to see Dalvin and learn that he, too, is an owl-shifter. Their wary friendship is on the brink of becoming something more when conspiracy and betrayal cause the peace talks to break down. The fight between the bear clans will be settled through a form of traditional challenge--a risky tactic that might lead to full-blown war. Rachel is determined to prevent that, even if it means taking up the challenge herself! At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied. USA Today bestselling author Cat Adams returns to the Blood Singer series with The Eldritch Conspiracy. Celia Graves was once an ordinary human, but those days are long gone. Now she strives to maintain her sanity and her soul while juggling both vampire

abilities and the powers of a Siren. Not every bride needs a bridesmaid who can double as a bodyguard. But Celia's cousin Adriana is no ordinary bride: she's a Siren princess, and she's marrying the king of a small but politically important European country. She's getting death threats from fanatics who want to see the whole Siren race wiped out—including Celia herself, who is half Siren. Luckily, Celia is on duty when a trip to a bridal salon is interrupted by an assassination attempt, so everyone survives. When Adriana returns to the Siren homeland to try to prevent a coup, Celia is free to hunt for the terrorists and the vile mage who is helping them (while keeping her eyes open for the perfect maid-of-honor dress). Assuming the bride and groom both live to see their wedding day, this will be one royal wedding no one will ever forget. Praise: "Urban fantasy has a special place in my heart, and the Occult Detective is perhaps the fundamental urban-fantasy archetype. An anthology of this kind is can serve two purposes: The first is to provide a taste of the genre to those that might otherwise be unfamiliar with it, and the second is to provide fans of the genre a chance to discover writers they may not have already come across. It was well worth the read and

I would recommend it wholeheartedly for any fan of the urban fantasy/occult detective genre; even more so if you are unfamiliar with the genre and would like a taste as to what it's all about." – Nick Bronson -- "Urban Fantasy readers will love this book, and it is a first-rate group of stories." – Paul Lappan, Reviewer DORA WANTS TO MAKE LOVE

*Specifically, Dora wants to make love with the handsome Rystani warrior-pilot Zical. But since Dora is a computer-albeit a sentient computer-she cannot experience touch, taste and true desire. Dora's logic functions refuse to accept this, so she uses the advanced technology of the 24th century to build herself a body specifically crafted to appeal to Zical, and downloads her computer brain into it. But Dora's sassy attitude makes her too different from the women of Zical's culture. He's attracted to Dora, but he won't make love to her. And while it would be easy for Dora to adapt to his desires, she likes being smart and funny; she's becoming good at being human. When Zical accidentally summons the ancient machines that protect the galaxy from invasion, Dora's mission is to intercept them and bring them back to the galaxy's rim. Fortunately for Dora, this puts her and Zical into very close quarters for a very long time. But much has changed, and as Dora learns more about human emotions and what they mean, she realizes that she doesn't just want to make love with Zical--she wants to love him. And be loved in return. USA Today bestselling author Cathy Clamp reboots the Sazi shapeshifter universe in *Forbidden*, a tightly-paced, high-tension urban fantasy thriller. Ten years have passed since the war that destroyed the Sazi Council and inflicted a*

horrible "cure" on thousands of Sazi, robbing them of their ability to shapeshift. Luna Lake, isolated in Washington State, started as a refugee camp for Sazi orphans. Now it's a small town and those refugees are young adults, chafing at the limits set by their still-fearful guardians. There's reason to fear: Sazi children are being kidnapped. Claire, a red wolf shifter, is sent to investigate. Held prisoner by the Snakes during childhood, Claire is distrusted by those who call Luna Lake home. Before the war, Alek was part of a wolf pack in Chicago. In Luna Lake he was adopted by a parliament of Owls, defying Sazi tradition. The kidnappings are a painful reminder that his little sister disappeared a decade ago. When Claire and Alek meet, sparks fly—but the desperate race to find the missing children forces them to set aside their mutual attraction and focus on the future of their people.

Mechanistic Studies of DNA Replication and Genetic Recombination emerged from a symposium on DNA replication and genetic recombination held from March 16-21, 1980 in Keystone, Colorado. The event featured 30 plenary session talks, 13 workshop discussion groups, and the 210 poster sessions. The studies described in this book are paving the way for the elucidation of other basic genetic mechanisms, including ""new"" areas in molecular genetics such as those of eukaryotic gene expression and the transposition of mobile genetic elements. This book is divided into 10 parts: summaries of workshop discussion groups (Part I); studies on eukaryotic model systems for DNA replication (Part II); studies on bacterial replication origins (Part III); studies on replication origins of bacterial phages and plasmids (Part IV); studies on eukaryotic replication origins (Part V); studies on prokaryotic replication enzymology (Part VI); studies on eukaryotic replication enzymology (Part VII);

studies on the fidelity of DNA replication (Part VIII); studies on DNA topoisomerases (Part IX); and studies of genetic recombination mechanisms (Part X).
