Race and Public Administration Aug 24 2020 Issues of race permeate virtually every corner of policy creation and implementation in the United States, yet theoretically driven research on interactions of policy, race, and ethnicity rarely offers practical tools that can be readily applied by current and future civil servants, private contractors, or nonprofit boards. A book that scholarship can and should inform practice to address issues of equity in public administration rather than overlook, ignore, or deny them, *Race and Public Administration* offers a much-needed and accessible exploration of current and cutting-edge research on race and public administration. This book evaluates what contradictions, unanswered questions, and best (or worst) practices exist in conducting and understanding research that can provide evidence-based policy and management guidance to practitioners in the field. Individual chapters are written by both established and emerging scholars and explore a wide range of policy areas, including public education, policing, health and access to healthcare, digital governance, nonprofit diversity, and international contexts. Together, the chapters serve as a link between theoretically informed research in public administration and those students and professionals trained to work in the trenches of public administration. This book is ideally suited as a text for courses in schools of public administration, public policy, or nonprofit management, and is required reading for those actively involved in policy analysis, creation, or evaluation.

Public Administration in Europe Jul 03 2021 This book considers the ways in which public administration (PA) has been studied in Europe over the last forty years, and examines in particular the contribution of EGPA, the European Group for Public Administration, both to the growth of a truly pan-European PA, and to the future of PA in Europe. The book provides a lively reflection on the state of the art of PA both over the past forty years and over the next forty years. It reflects on the consolidation and institutionalisation of EGPA as the European community for the study of PA in Europe, and demonstrates the need for such a regional group for PA in Europe, as well as for regional groups for the study of PA in other parts of the world. The book also demonstrates the functional, cultural and institutional reasons that underpin the significance of a regional group for researching and studying PA at an 'intermediate level of governance' between the national and the global levels. The book provides rich insights about the state of the art of PA in Europe from the leading public administration scholars.

Public Administration and Law, Third Edition Jan 09 2022 Since the first edition of *Public Administration and Law* was published in 1983, it has retained its unique status of being the only book in the field of public administration that analyzes how constitutional law regulates and informs the way administrators interact with each other and the public. Examining the Fourth, Fifth, Eighth, and Fourteenth Amendment rights as they pertain to these encounters, it explains how public administrators must do their jobs and how administrative systems operate in order to comply with constitutional law. Explores the conflicts between law and public administration. This book begins by presenting a historical account of the way constitutional and administrative law have incrementally "retrofitted" public agencies into the nation's constitutional design. It examines the federal judiciary's impact on federal administration and the effect of the nation's myriad environmental laws on public administration. Next, it focuses on the role of the individual as a client and customer of public agencies. In a discussion of the Fourth Amendment, it examines street-level encounters between citizens and law enforcement. Responding to the rise of the new public management (NPM), it also adds, for the first time in this edition, a chapter that analyzes the rights of the individual not only as a government employee but also as a government contractor. Enhanced with numerous references throughout, the chapters of the book address issues concerning the rights of inmates in administrative institutions and balancing the need to protect individual rights with the ability of agencies to function effectively. Supplemented with case citations and lists of articles, books, and documents, this text is designed to facilitate further study in a constantly evolving area of public administration. Rosenbloom, Ph.D. is Distinguished Professor of Public Administration in the School of Public Affairs at American University in Washington, D.C. and Chair Professor of Public Management at City University of Hong Kong. Public Administration and Society Oct 06 2021 For instructors who want to expose their students to the social, political, and historical context of the practice of public administration this book provides a unique approach to the introductory PA course. The author's own research is skillfully interwoven with a collection of seminal readings and documents that illuminate key issues of past and present for public service professionals in a democratic society. Rather than an overview of public administration, Public Administration and Society offers students a broad perspective on the American Founding Era, the relationship of citizens to government, and how the structure of government reflects societal values. The premise of the book is that understanding the societal context is important to the success of the practitioner and to the practitioner's role as a responsible agent of change in a democratic society. Introductory essays and readings offer students perspectives on five important themes in public administration: the Founding-Era debate over the size and scope of government, the relationship of the community to the individual, public organizations and policy making, societal values and public administration, and the role of the public service practitioner in a democratic society. This new edition features five new readings, and, based on input from adopters, an entirely new section on public policy making (Part IV: Public Organizations and Policy). The author's part-opening sections have all been extensively revised and updated.

Public Administration in Conflict Affected Countries 2022 This book highlights the main factors determining the quality of public administration in conflict affected countries and assesses to what extent the conflict determines and impacts on the performance of public administration in affected countries. The main value added by this book is confirming the general expectation that there is no direct and universal link between the conflict and public administration performance (and vice-versa). One may need to argue that each country's situation differs and specific factors of internal and external environments determine the trends of public administration performance in conflict affected countries. To achieve the overarching goal of the book, sixteen country studies were developed from all relevant continents - America, Africa, Asia and Europe: Bangladesh, Colombia, Croatia, Egypt, Georgia, Iraq, Kosovo, Nigeria, Palestine, Paraguay, Philippines, Serbia, South Africa, Uganda, Ukraine, and Venezuela.

Public Value and Public Administration Aug 04 2021 Governments and nonprofits exist to create public value. Yet what does that mean in theory and practice? This new volume

together key experts in the field to offer unique, wide-ranging answers. From the United States, Europe, and Australia, the contributors focus on the creation, meaning, measurement and assessment of public value in a world where government, nonprofit organizations, business, and citizens all have roles in the public sphere. In so doing, they demonstrate an intimate link between ideas of public value and public values and the ways scholars think and measure them. They also add to ongoing debates over what public value might mean, the nature of the most important public values, and how we can practically apply these values. The collection concludes with an extensive research and practice agenda conceived to advance the field and mainstream its ideas. Aimed at scholars, students, and stakeholders ranging from business and government to nonprofits and activist groups, *Public Value and Public Administration* is an essential blueprint for those interested in creating public value to advance the common good.

It details the reasons behind the major differences in the modernisation paths followed and their attendant inconsistencies and how, despite the adoption of various and solutions prevailing in the EU upon accession, these countries are shifting, to varying degrees, towards institutional design reminiscent of illiberal democracies. State Management Mar 19 2020 State Management offers a comprehensive yet concise introduction to the new field of state management, presenting an analysis of basic questions within the theories of bureaucracy, policy-making, principal-agent modelling and policy networks. Focussing upon recent state transformation, it illuminates public sector reform strategies such as New Public Management as well as incorporation, tendering and bidding, decentralization, team production and privatization. This book argues that we should look upon the variety of models or approaches to public management or public administration all belonging under "state management". In this text, Jan-Erik Lane systematically examines the key approaches to the study of how government attempts to achieve these goals, discussing the pros and cons of alternative frameworks of analysis. Each chapter discusses a different issue within state management that is integral to the broader debate, including: Public regulation The relationship between the law and the state Combining ecology and policy making Multi-governance The virtues and vices of public-private partnerships Policy implementation Presenting a clear overview of how the state operates when government sets out to

public services, and generating questions to encourage new research, State Management is a valuable new text for both undergraduate and postgraduate courses in political science, public administration and public management.
