Lydia Quixano Perez lives in the Mexican city of Acapulco. She runs a bookstore. She has a son, Luca, the love of her life, and a wonderful husband who is a journalist. And while cracks are beginning to show in Acapulco because of the drug cartels, her life is, by and large, reasonably comfortable. Even though she knows they'll never sell, Lydia stocks some of her all-time favorite books in her store. And then one day a man enters the shop to browse and comes up to the register with four books he would like to buy,

two of them her favorites. Javier is erudite. He is charming. And, unbeknownst to Lydia, he is the jefe of the newest drug cartel that has gruesomely taken over the city. When Lydia's husband's tell-all profile of Javier is published, none of their lives will ever be the same. Forced to flee, Lydia and eight-year-old Luca soon find themselves miles and worlds away from their comfortable middle-class existence. Bestselling author Sherman Alexie tells the story of Junior, a budding cartoonist growing up on the Spokane Indian Reservation. Determined to take his future into his own hands, Junior leaves his troubled school on the rez to attend an all-white farm town high school where the only other Indian is the school mascot. Heartbreaking, funny, and beautifully written, *The Absolutely True Diary of a Part-Time Indian*, which is based on the author's own experiences, coupled with poignant drawings by Ellen Forney that reflect the character's art, chronicles the contemporary adolescence of one Native American boy as he attempts to break away from the life he was destined to live. With a forward by Markus Zusak, interviews with Sherman Alexie and Ellen Forney, and four-color interior art throughout, this edition is perfect for fans and collectors alike. Historically, it was guns, germs, and steel that determined the fates of people and nations. Now, more than ever, it is electricity. Global demand for power is doubling every two decades, but electricity remains one of the most difficult forms of energy to supply and do so reliably. Today, some three billion people live in places where per-capita electricity use is less than what's used by an average American refrigerator. How we close the colossal gap between the electricity rich and the electricity poor will determine our success in addressing issues like women's rights, inequality, and climate change. In *A Question of Power*, veteran journalist Robert Bryce tells the human story of electricity, the world's most important form of energy. Through onsite reporting from India, Iceland, Lebanon, Puerto Rico, New York, and Colorado, he shows how our cities, our money--our very lives--depend on reliable flows of electricity. He highlights the factors needed for successful electrification and explains why so many people are still stuck in the dark. With vivid writing and incisive analysis, he powerfully debunks the notion that our energy needs can be met solely with renewables and demonstrates why--if we are serious about addressing climate change--nuclear energy must play a much bigger role. Electricity has fueled a new epoch in the history of civilization. *A Question of Power* explains how that happened and what it means for our future. A New York Times Bestseller A Wall Street Journal Bestseller A New York Times Notable Book of 2020 A New York Times Book Review Editors' Choice Shortlisted for the Financial Times and McKinsey Business Book of the Year A New Statesman Book to Read From economist Anne Case and Nobel Prize winner Angus Deaton, a groundbreaking account of how the flaws in capitalism are fatal for America's working class Deaths of despair from suicide, drug overdose, and alcoholism are rising dramatically in the United States, claiming hundreds of thousands of American lives. Anne Case and Angus Deaton explain the overwhelming surge in these deaths and shed light on the social and economic forces that are making life harder for the working class. As the college educated become healthier and wealthier, adults

without a degree are literally dying from pain and despair. Case and Deaton tie the crisis to the weakening position of labor, the growing power of corporations, and a rapacious health-care sector that redistributes working-class wages into the pockets of the wealthy. This critically important book paints a troubling portrait of the American dream in decline, and provides solutions that can rein in capitalism's excesses and make it work for everyone. This study examined the feasibility of just one approach to coordinating transportation and land use planning. The lack of such coordination in the United States has been the subject of much criticism. In rural areas, the locality usually controls land development decisions whereas the state generally controls transportation decisions. In Virginia, Botetourt County and the Virginia Department of Transportation (VDOT) initiated a pilot planning process to coordinate transportation and land use planning. In that process, VDOT personnel served as staff for the county, which was the client. The immediate goal of this effort was a scenarios analysis. Botetourt specified potential zoning scenarios for consideration, and VDOT estimated the likely impacts of each scenario on the immediate transportation network. Botetourt benefited from this relationship by having access to engineering staff who can provide a quantitative analysis of delay at key intersections, and VDOT benefited by helping to ensure that Botetourt had the opportunity to consider the transportation impacts in its zoning decisions. To support this scenarios development, three additional deliverables were developed: a data element protocol, an action plan, and a template for replicating this process with other Virginia counties. Seven steps comprise this template: (1) define a problem statement quickly, imperfectly, and iteratively; (2) use quick updates to resolve shortcomings; (3) maintain momentum; (4) keep everyone updated equally; (5) recognize that the county is the client; (6) dedicate staff; and (7) end the process with a

tangible deliverable. Details of how these steps were accomplished are provided to facilitate the transfer of these lessons to other counties and VDOT. From one of the leading policy experts of our time, an urgent rethinking of how we can better support each other to thrive Whether we realize it or not, all of us participate in the social contract every day through mutual obligations among our family, community, place of work, and fellow citizens. Caring for others, paying taxes, and benefiting from public services define the social contract that supports and binds us together as a society. Today, however, our social contract has been broken by changing gender roles, technology, new models of work, aging, and the perils of climate change. Minouche Shafik takes us through stages of life we all experience—raising children, getting educated, falling ill, working, growing old—and shows how a reordering of our societies is possible. Drawing on evidence and examples from around the world, she shows how every country can provide citizens with the basics to have a decent life and be able to contribute to society. But we owe each other more than this. A more generous and inclusive society would also share more risks collectively and ask everyone to contribute for as long as they can so that everyone can fulfill their potential. What We Owe Each Other identifies the key elements of a better social contract that recognizes our interdependencies, supports and invests more in each other, and expects more of individuals in return. Powerful, hopeful, and thought-provoking, *What We Owe Each Other* provides practical solutions to current challenges and demonstrates how we can build a better society—together. "As a leading researcher in the field of biology, Robin Wall Kimmerer understands the delicate state of our world. But as an active member of the Potawatomi nation, she senses and relates to the world through a way of knowing far older than any science. In *Braiding Sweetgrass*, she intertwines these two modes of awareness--the analytic and the emotional, the scientific and the cultural--to ultimately reveal a path toward healing the rift that grows between people and nature. The woven essays that construct this book bring people back into conversation with all that is green and growing; a universe that never stopped speaking to us, even when we forgot

how to listen"-- Anna Howard Shaw: The Story of a Pioneer is one of the classic autobiographies of American letters. A leader in the church as well as the suffrage movement, an M.D. as well as a powerful and eloquent lecturer, Anna Howard Shaw (1847-1919) was a close associate of Susan B. Anthony and the first woman to receive the United States Distinguished Service Medal. Born in England, Shaw immigrated to the United States as a child and in 1880 became the first woman ordained as a Methodist preacher. She subsequently left the pulpit to serve as president of the National American Suffrage Association--and later, as head of the Women's Committee of the Council of National Defense during World War I. Leontine T. C. Kelly was the first woman African American bishop in the United Methodist church. She retired in 1988. This is a book about Courage and Patriotism. It tells the dramatic stories of a number of American politicians of various political and regional allegiances whose one overriding loyalty was to the United States and to the right as God gave them to see it. They range from born aristocrats to self-made men. Some are well-known, some almost forgotten. But all of them, in the face of dreadful consequences, exhibited a special kind of greatness. These stories about them remind us sharply that there is, in addition to a courage with which men die, a courage by which men must live. —Print Ed. A wide-ranging and authoritative history of SOGAT, which provides a valuable insight into the paper and printing industries during a period of great change, and an examination of crucial moments in recent UK industrial relations history. The #1 international best seller In Lean In, Sheryl Sandberg reignited the conversation around women in the workplace. Sandberg is chief operating officer of Facebook and coauthor of Option B with Adam Grant. In 2010, she gave an electrifying TED talk in which she described how women unintentionally hold themselves back in their careers. Her talk, which has been viewed more than six million times, encouraged women to "sit at the table," seek challenges, take risks, and pursue their goals with gusto. Lean In continues that conversation, combining personal anecdotes, hard data, and compelling research to change the conversation from what women can't do to what they can. Sandberg provides practical advice on negotiation techniques, mentorship, and building a satisfying career. She describes specific steps women can take to combine professional achievement with personal fulfillment, and demonstrates how men can benefit by supporting women both in the workplace and at home. Written with humor and wisdom, Lean In is a revelatory, inspiring call to action and a blueprint for individual growth that will empower women around the world to achieve their full potential. Living on a damaged planet challenges who we are and where we live. This timely anthology calls on twenty eminent humanists and scientists to revitalize curiosity, observation, and transdisciplinary conversation about life on earth. As human-induced environmental change threatens multispecies livability, Arts of Living on a Damaged Planet puts forward a bold proposal: entangled histories, situated narratives, and thick descriptions offer urgent "arts of living." Included are essays by scholars in anthropology, ecology, science studies, art, literature, and bioinformatics who posit critical and creative tools for collaborative survival in a more-than-human

Anthropocene. The essays are organized around two key figures that also serve as the publication's two openings: Ghosts, or landscapes haunted by the violences of modernity; and Monsters, or interspecies and intraspecies sociality. Ghosts and Monsters are tentacular, windy, and arboreal arts that invite readers to encounter ants, lichen, rocks, electrons, flying foxes, salmon, chestnut trees, mud volcanoes, border zones, graves, radioactive waste—in short, the wonders and terrors of an unintended epoch. A trenchant analysis of how public education is being destroyed in overt and deceptive ways—and how to fight back “A powerful analysis of the predatory, profit-seeking forces that threaten our nation's public schools. . . . If you care about the future of our society, read this book.” —Diane Ravitch, author of *Slaying Goliath* and *Reign of Error* In the “vigorous, well-informed” (Kirkus Reviews) *A Wolf at the Schoolhouse Door*, the co-hosts of the popular education podcast *Have You Heard* expose the potent network of conservative

elected officials, advocacy groups, funders, and think tanks that are pushing a radical vision to do away with public education. “Cut[ing] through the rhetorical fog surrounding a host of free-market reforms and innovations” (Mike Rose), Jack Schneider and Jennifer Berkshire lay bare the dogma of privatization and reveal how it fits into the current context of right-wing political movements. *A Wolf at the Schoolhouse Door* “goes above and beyond the typical explanations” (SchoolPolicy.org), giving readers an up-close look at the policies—school vouchers, the war on teachers’ unions, tax credit scholarships, virtual schools, and more—driving the movement’s agenda. Called “well-researched, carefully argued, and alarming” by Library Journal, this smart, essential book has already incited a public reckoning on behalf of the millions of families served by the American educational system—and many more who stand to suffer from its unmaking. “Just as with good sci-fi,” according to Jacobin, “the authors make a compelling case that, based on our current trajectory, a nightmare future is closer than we think.”

On Winston Churchill’s first day as prime minister, Adolf Hitler invaded Holland and Belgium. Poland and Czechoslovakia had already fallen, and the Dunkirk evacuation was just two weeks away. For the next twelve months, Hitler would wage a relentless bombing campaign, killing 45,000 Britons. It was up to Churchill to hold his country together and persuade President Franklin Roosevelt that Britain was a worthy ally—and willing to fight to the end. In *The Splendid and the Vile*, Erik Larson shows, in cinematic detail, how Churchill taught the British people “the art of being fearless.” It is a story of political brinkmanship, but it’s also an intimate domestic drama, set against the backdrop of Churchill’s prime-ministerial country home, Chequers; his wartime retreat, Ditchley, where he and his entourage go when the moon is brightest and the bombing threat is highest; and of course 10 Downing Street in London. Drawing on diaries, original archival documents, and once-secret intelligence reports—some released only recently—Larson provides a new lens on London’s darkest year through the day-to-day experience of Churchill and his family: his wife, Clementine; their youngest daughter, Mary, who chafes against her parents’ wartime protectiveness; their son, Randolph, and his beautiful, unhappy wife, Pamela; Pamela’s illicit lover, a dashing American emissary; and the advisers in Churchill’s “Secret Circle,” to whom he turns in the hardest moments. *The Splendid and the Vile* takes readers out of today’s political dysfunction and back to a time of true leadership, when, in the face of unrelenting horror, Churchill’s eloquence, courage, and

perseverance bound a country, and a family, together. A dynamic stochastic equilibrium model of a small open economy is used to quantify the macroeconomic effects of introducing capital controls to stabilize the balance of trade. This model focuses on the role of international trade and foreign debt as instruments that help smooth consumption in response to productivity or terms-of-trade disturbances. The model rationalizes some key empirical regularities that characterize business fluctuations and the dynamics of savings and investment in post-war Canada. The results show that capital controls have small effects on both the basic characteristics of macroeconomic fluctuations and the level of welfare. A fiscal strategy that successfully enforces capital controls by introducing taxes on foreign interest income is also studied in some detail. #1 NEW YORK TIMES BESTSELLER • In her latest book, Brené Brown writes, “If we want to find the way back to ourselves and one another, we need language and the grounded confidence to both tell our stories and be stewards of the stories that we hear. This is the framework for meaningful connection.” In *Atlas of the Heart*, Brown takes us on a journey through eighty-seven of the emotions and experiences that define what it means to be human. As she maps the necessary skills and an actionable framework for meaningful connection, she gives us the language and tools to access a universe of new choices and second chances—a universe where we can share and steward the stories of our bravest and most heartbreaking moments with one another in a way that builds connection. Over the past two decades, Brown’s extensive research into the experiences that make us who we are has shaped the cultural conversation and helped define what it means to be courageous with our lives. *Atlas of the Heart* draws on this research, as well as on Brown’s singular skills as a storyteller, to show us how accurately naming an experience doesn’t give the experience more power—it gives us the power of understanding, meaning, and choice. Brown shares, “I want this book to be an atlas for all of us, because I believe that, with an adventurous heart and the right maps, we can travel anywhere and never fear losing ourselves.”

The beloved star of *Friends* takes us behind the scenes of the hit sitcom and his struggles with addiction in this candid, funny, and revelatory memoir that delivers a powerful message of hope and persistence. 'Hi, my name is Matthew, although you may know me by another name.

My friends call me Matty. And I should be dead.' So begins the riveting story of acclaimed actor Matthew Perry, taking us along on his journey from childhood ambition to fame to addiction and recovery in the aftermath of a life-threatening health scare. Before the frequent hospital visits and stints in rehab, there was five-year-old Matthew, who travelled from Montreal to Los Angeles, shuffling between his separated parents; fourteen-year-old Matthew, who was a nationally ranked tennis star in Canada; twenty-four-year-old Matthew, who nabbed a coveted role as a lead cast member on the talked-about pilot then called *Friends Like Us*. . . and so much more. In an extraordinary story that only he could tell - and in the heartfelt, hilarious, and warmly familiar way only he could tell it - Matthew Perry lays bare the fractured family that raised him (and also left him to his own devices), the desire for recognition that drove him to fame, and the void inside him that could not be filled even by his greatest dreams coming true. But he also details the peace he's found in sobriety and how he feels about the ubiquity of *Friends*, sharing stories about his castmates and other stars he met along the way. Frank, self-aware, and with his trademark humour, Perry vividly depicts his lifelong battle with addiction and what fuelled it despite seemingly having it all. *Friends, Lovers, and the Big Terrible Thing* is an unforgettable memoir that is both intimate and eye-opening - as well as a hand extended to anyone struggling with sobriety. Unflinchingly honest, moving, and uproariously funny, this is the book fans have been waiting for. **NATIONAL BESTSELLER** • The astonishing and hugely entertaining story that completely changed the way we run. How the prized matsutake mushroom is remaking human communities in China—and providing new ways to understand human and more-than-human worlds *What a Mushroom Lives For* pushes today's mushroom renaissance in compelling new directions. For centuries, Western science has promoted a human- and animal-centric framework of what counts as action, agency, movement, and behavior. But, as Michael Hathaway shows, the world-making capacities of mushrooms radically challenge this orthodoxy by revealing the lively dynamism of all forms of life. The book tells the fascinating story of one particularly prized species, the matsutake, and the astonishing ways it is silently yet powerfully shaping worlds, from the Tibetan

plateau to the mushrooms' final destination in Japan. Many Tibetan and Yi people have dedicated their lives to picking and selling this mushroom—a delicacy that drives a multibillion-dollar global trade network and that still grows only in the wild, despite scientists' intensive efforts to cultivate it in urban labs. But this is far from a simple story of humans exploiting a passive, edible commodity. Rather, the book reveals the complex, symbiotic ways that mushrooms, plants, humans, and other animals interact. It explores how the world looks to the mushrooms, as well as to the people who have grown rich harvesting them. A surprise-filled journey into science and human culture, this exciting and provocative book shows how fungi shape our planet and our lives in strange, diverse, and often unimaginable ways. The face of the pedestrian safety crisis looks a lot like Ignacio Duarte-Rodriguez. The 77-year old grandfather was struck in a hit-and-run crash while trying to cross a high-speed, six-lane road without crosswalks near his son's home in Phoenix, Arizona. He was one of the more than 6,000 people killed while walking in America in 2018. In the last ten years, there has been a 50 percent increase in pedestrian deaths. The tragedy of traffic violence has barely registered with the media and wider culture. Disproportionately the victims are like Duarte-Rodriguez—immigrants, the poor, and people of color. They have largely been blamed and forgotten. In *Right of Way*, journalist Angie Schmitt shows us that deaths like Duarte-Rodriguez's are not unavoidable "accidents." They don't happen because of jaywalking or distracted walking. They are predictable, occurring in stark geographic patterns that tell a story about systemic inequality. These deaths are the forgotten faces of an increasingly urgent public-health crisis that we have the tools, but not the will, to solve. Schmitt examines the possible causes of the increase in pedestrian deaths as well as programs and movements that are beginning to respond to the epidemic. Her investigation unveils why pedestrians are dying—and she demands action. *Right of Way* is a call to reframe the problem, acknowledge the role of racism and classism in the public response to these deaths, and energize advocacy around road safety. Ultimately, Schmitt argues that we need improvements in infrastructure and changes to policy to save lives. *Right of Way* unveils a crisis that is rooted in both inequality and the undeterred reign of the automobile in our cities. It challenges us to imagine and demand safer and more equitable cities, where no one is expendable. N. Brisch examines the literary legacy of the dynasty of Larsa, terminated by Hammurabi of Babylon in 1763 B.C.E. "The dynasties of Isin and Larsa -- fierce rivals in contending for hegemony over Babylonia -- rarely or never acknowledged their Amorite origins openly, but instead affiliated themselves with Sumerian traditions of royal legitimization. This becomes apparent in the literary texts of the Isin and Larsa rulers, which in all but a few cases were composed in Sumerian, a language that to the best of our knowledge was no longer spoken by this time. Thus, the choice of Sumerian for these compositions is in itself significant. It is only with the rulers of the first dynasty of Babylon (...) that we see the beginnings of a movement away from the Sumerian tradition and the replacement by Akkadian as the language of choice in literary texts. The Larsa dynasty, or more precisely its literary heritage, is positioned at the brink of this change from a certain tradition, for example, visible in the heroic literature on Sumerian kings, to certain new developments (...). Because of these innovations the Larsa royal literature occupies a unique position within the corpus of Sumerian royal literature, which is often perceived as particularly traditional. -- The study of the literary, historical and linguistic contexts of the Larsa Court Poetry is supplemented by the editions of 14 royal hymns and royal letters mainly of Sin-iddinam and Rim-Sin.

From America's "secret diplomatic weapon" (*The Atlantic*)--a man who served five presidents and ten secretaries of state--comes an impassioned argument for the enduring value of diplomacy in an increasingly volatile world. Over the course of more than three decades as an American diplomat, William J. Burns played a central role in the most consequential diplomatic episodes of his time--from the bloodless end of the Cold War to the collapse of post-Cold War relations with Putin's Russia, from post-9/11 tumult in the Middle East to the secret nuclear talks with Iran. Burns is widely regarded as one of the most distinguished and admired American statesmen of the last half century. Upon his retirement in 2014, Secretary John Kerry said Burns belonged on "a very short list of American diplomatic legends," alongside George Kennan. In *The Back Channel*, Burns recounts, with novelistic detail and incisive analysis, some of the seminal moments of his career. Drawing on a trove of newly declassified cables and memos, he gives readers a rare inside look at American diplomacy in action. His dispatches from war-torn Chechnya and Qaddafi's bizarre camp in the Libyan desert and his warnings of the "Perfect Storm" that would be unleashed by the Iraq War will reshape our understanding of history--and inform the policy debates of the future. Burns sketches the contours of effective American leadership in a world that resembles neither the zero-sum Cold War contest of his early years as a diplomat nor the "unipolar moment" of American primacy that followed. Ultimately, *The Back Channel* is an eloquent, deeply informed, and timely story of a

life spent in service of American interests abroad. It is also a powerful reminder, in a time of great turmoil, of the enduring importance of diplomacy. Advance praise for *The Back Channel* "Bill Burns is simply one of the finest U.S. diplomats of the last half century. *The Back Channel* demonstrates his rare and precious combination of strategic insight and policy action. It is full of riveting historical detail but also, more important, shrewd insights into how we can advance our interests and values in a world where U.S. leadership remains the linchpin of international order."--James A. Baker III "Bill Burns is a stellar exemplar of the grand tradition of wise Americans who made our country the indispensable nation in this world. *The Back Channel* shows how diplomacy works, why it matters, and why its recent demise is so tragic."--Walter Isaacson, author of *Leonardo da Vinci In The Archive* and the Repertoire preeminent performance studies scholar Diana Taylor provides a new understanding of the vital role of performance in the Americas. From plays to official events to grassroots protests, performance, she argues, must be taken seriously as a means of storing and transmitting knowledge. Taylor reveals how the repertoire of embodied memory—conveyed in gestures, the spoken word, movement, dance, song, and other performances—offers alternative perspectives to those derived from the written archive and is particularly useful to a reconsideration of historical processes of transnational contact. *The Archive and the Repertoire* invites a remapping of the Americas based on traditions of embodied practice. Examining various genres of performance including demonstrations by the children of the disappeared in Argentina, the Peruvian theatre group Yuyachkani, and televised astrological readings by Univision personality Walter Mercado, Taylor explores how the archive and the repertoire work together to make political claims, transmit traumatic memory, and forge a new sense of cultural identity. Through her consideration of performances such as Coco Fusco and Guillermo Gómez-Peña's show *Two Undiscovered Amerindians Visit . . .*, Taylor illuminates how scenarios of discovery and conquest haunt the Americas, trapping even those who attempt to dismantle them. Meditating on events like those of September 11, 2001 and media representations of them, she examines both the crucial role of performance in contemporary culture and her own role as witness to and participant in hemispheric dramas. *The Archive and the Repertoire* is a compelling demonstration of the many ways that the study of performance enables a deeper understanding of the past and present, of ourselves and others.
