Impact response, damage tolerance and failure of fibre-reinforced composite materials and structures have been extensively investigated from a number of viewpoints. This book brings together the most recent work from experts in the field. Reproduction of the original: Chaucer ?s Works by Geoffrey Chaucer This early classical journal, collected in two volumes in 1826, illuminates the development of academic journals and classical scholarship. This monograph systematically develops and considers the so-called "dressing method" for solving differential equations (both linear and nonlinear), a means to generate new non-trivial solutions for a given equation from the (perhaps trivial) solution of the same or related equation. Throughout, the text exploits the "linear experience" of presentation, with special attention given to the algebraic aspects of the main mathematical constructions and to practical rules of obtaining new solutions. This book provides a critical edition of the 'O' manuscript (beginning of the 14th century) of the Roman de Renart. It is supplemented by a varia lectio which takes into account the different readings of the most important 'branches' or short texts of the Roman de Renart. The edition includes an introduction of the work from the perspective of literary studies and philology and explores in detail the main linguistic characteristics of the manuscript. Furthermore, the introduction emphasizes the adaptability within the Renart tradition and documents the creativity of a scribe who added some verses of his own to the text he copied. THE ROUGH GUIDE TO SOUTHEAST ASIA is the essential handbook to this stunning region, covering nine countries plus Hong Kong and Macau. Features include: Full-colour section introducing Southeast Asia's highlights. Unrivalled accounts of every destination, from vibrant cities to the remotest beaches. Lively reviews of the best places to stay, eat, drink and party. Detailed coverage of a wealth of activities, such as the sunrise climb up Mount Bromo, travelling along the Mekong River and diving in the Philippines. Dependable transport details, including border crossings and island ferries. Maps and plans for every region. Short-listed for the 2002 Award for Excellence in Historical Recorded Sound Research In the seventy years since 1931, various organizations large and small, including several semi-private ones, have issued or re-issued various original 78 rpm recordings from original metal plates. No comprehensive listing of these has ever before appeared; this is the first, and gathers together all the various information of ongoing interest. This is a most important addition to the record-collecting bibliography. "The present edition of Chaucer contains an entirely new Text, founded solely on the manuscripts and on the earliest accessible printed editions. For correct copies of the manuscripts, I am indebted, except in a few rare instances, to the admirable texts published by the Chaucer Society. In each case, the best copy has been selected as the basis of the text, and has only been departed from where other copies afforded a better reading. All such variations, as regards the wording of the text, are invariably recorded in the footnotes at the bottom of each page; or, in the case of the Treatise on the Astrolabe, in Critical Notes immediately following the text. Variations in the spelling are also recorded, wherever they can be said to be of consequence. But I have purposely abstained from recording variations of reading that are certainly inferior to the reading given in the text." The objective of these proceedings was to provide a platform for the exchange of information on the design, construction and operation of fusion experiments. The technology which is being developed for the next step devices and fusion reactors was also covered.
