Il turismo è uno dei settori forti dell'economia mondiale ed è diventato il fronte di sperimentazione più avanzato dell'economia dell'esperienza, dell'innovazione tecnologica applicata ai trasporti e all'intrattenimento, della sharing economy, dell'architettura. Il libro racconta cos'era il turismo ieri e i grandi cambiamenti economici, sociali e tecnologici che lo stanno trasformando: dalla nascita dei parchi a tema all'invenzione del trolley, dai viaggi sulle meganavi al gaming nei musei, da Airbnb all'uso dei big data per gestire i flussi e indirizzare le scelte dei turisti. Queste trasformazioni riguardano anche gli stili di consumo dei turisti e pongono importanti sfide in termini di innovazione. Come emergere in un mercato sempre più affollato di proposte? Come viaggeranno le persone in un prossimo futuro? Tourism and Ecosystems services are inter-dependant and facing unique challenges. This book explores the challenges faced by destinations regarding the management and restoration of their ecosystem services. Responding to the effects of the Covid-19 pandemic, this book offers unique management solutions based on best practices from Europe, America, Asia, and Africa, Indonesia and island destinations. The management techniques and strategies proposed are adaptive in nature and they are meant to protect and sustain natural and cultural ecosystem services utilized by the tourism industry. Drawing from a rich collection of international case studies, the book adopts a user-friendly pedagogic approach, while seeking to be an essential future reference to scholars, researchers, academics and industry practitioners, destination management organizations and restoration agencies. El libro Avances de Investigación de las

Organizaciones con un enfoque interdisciplinario es un importante esfuerzo de investigadoras e investigadores y estudiantes que quieren poner en valor su análisis y descubrimientos en torno a sus temas de investigación. Cada uno de los capítulos posee un análisis con enfoques orientados hacia la aproximación de la interdisciplinariedad. Además, los trabajos muestran una gran variedad de problemáticas que se encuentran en diversos sectores organizacionales y, de forma creativa, intentan ofrecer algunas alternativas relacionadas con su abordaje y su posible atención a estas dificultades que se presentan en la sociedad mexicana y, de esta manera contribuir a los sectores sociales en pro del desarrollo y bienestar de los ciudadanos. Esto se logró a través de la reflexión sobre los Programas Nacionales Estratégicos desarrollados en México, con el objetivo de articular las capacidades científico-técnicas que contribuyen a la solución de problemáticas nacionales que permiten la intervención de diversos saberes para comprender una serie de situaciones complejas que se presentan en el territorio nacional y que es necesario investigar en profundidad para ofrecer escenarios que ayuden a resolver y mitigar los problemas que se presentan.

What challenges and opportunities does the green transition entail for Latin America and the Caribbean? This 15th edition of the Latin American Economic Outlook explores options for the region to recast its production models, transform its energy matrix and create better jobs in the process. Throughout the world there is evidence of mounting interest in marine resources and new maritime industries to create jobs, economic growth and to help in the provision of energy and food security. Expanding populations, insecurity of traditional sources of supply and the effects of climate change add urgency to a perceived need to address and overcome the serious challenges of working in the maritime environment. Four promising areas of activity for 'Blue Growth' have been identified at European Union policy level including Aquaculture; Renewable Energy (offshore wind, wave and tide); Seabed Mining; and Blue Biotechnology. Work has started to raise the technological and investment readiness levels (TRLs and IRLs) of these prospective industries drawing on the experience of established maritime industries such as Offshore Oil and Gas; Shipping; Fisheries and Tourism. An accord has to be struck between policy makers and regulators on the one hand, anxious to direct research and business incentives in effective and efficient directions, and developers, investors and businesses on the other, anxious to reduce the risks of such potentially profitable but innovative investments. The EU H2020 MARIBE (Marine Investment for the Blue Economy) funded project was designed to identify the key technical and non-technical challenges facing maritime industries and to place them into the social and economic context of the coastal and ocean economy. MARIBE went on to examine with companies, real projects for the combination of marine industry sectors into multi-use platforms (MUPs). The purpose of this book is to publish the detailed analysis of each prospective and established maritime business sector. Sector experts working to a common template explain what these industries are, how they work, their prospects to create wealth and employment, and where they currently stand in terms of innovation, trends and their lifecycle. The book goes on to describe progress with the changing regulatory and planning regimes in the European Sea Basins including the Caribbean where there are significant European interests. The book includes:

- Experienced chapter authors from a truly multidisciplinary team of sector specialisms
- First extensive study to compare and contrast traditional Blue Economy with Blue Growth
- Complementary to EU and National policies for multi-use of maritime space

En este libro, los autores –José Miguel Aguilera y Felipe Larraín– resaltan la participación presente y futura del país en los grandes desafíos globales de la humanidad, como los profundos efectos del cambio climático, la

comprensión de nuestro lugar en el universo, la urgencia de la conservación medioambiental, y el reto de tener un desarrollo humano en entornos sustentables, resilientes y participativos. Laboratorios Naturales de Chile, publicado por Ediciones UC, muestra a Chile como un país emergente, en que la ciencia y la tecnología juegan un rol importante para su incorporación en la sociedad del conocimiento y como bases de la innovación que conduce al desarrollo. "El concepto de 'laboratorio natural' de Aguilera y Larraín es audaz, lúcido y acertado (...). Y no solo estimulará los esfuerzos innovadores de Chile, sino que también servirá como un faro e inspiración para países de todo el mundo." JEFFREY D. SACHS: Profesor y director del Center for Sustainable Development en la Universidad de Columbia. En este libro se presenta el tomo IV: "Ética y buen vivir. Reflexiones actuales para la planificación y gestión del turismo", cuyo objetivo es dar a conocer trabajos de investigación relacionados con el desarrollo del turismo involucrando variables como la ética, el bienestar, la calidad de vida y la felicidad, especialmente, en las comunidades receptoras. Los trabajos incluidos plantean una visión más amplia y contemporánea del turismo en la cual se construyen escenarios y prácticas colectivas que lleven a formas innovadoras de planificación y gestión del turismo. Sin duda, esta publicación apoya una visión multidimensional del fenómeno turístico que trasciende su carácter meramente económico (sin negar su importancia), y por lo tanto, ofrece un aporte a la visibilización de sus dimensiones social, ética, cultural, política y ambiental. En este sentido, los desarrollos turísticos se convierten en procesos complejos capaces de aportar o amenazar el bienestar, la calidad de vida, la convivencia y la concepción ética de los diversos actores involucrados. El libro presenta, por un lado, investigaciones que buscan plantear reflexiones éticas en torno al desarrollo del turismo, así como los retos a los que los destinos se ven enfrentados ante las prácticas turísticas que generan inconformidad por parte de las comunidades. Por otro lado, el compendio también presenta investigaciones que analizan al turismo en relación con el buen vivir: calidad de vida, sostenibilidad, bienestar y felicidad This two-volume collection analyses the evolution of wine production in European regions across the nineteenth and twentieth centuries. France and Italy in particular have shaped modern viticulture, by improving oenological methods and knowledge, then disseminating them internationally. This second volume looks closely at wine markets and trade, also examining the role of institutions and quality regulation. The way we talk, work, learn, and think has been greatly shaped by modern technology. These lifestyle changes have made digital literacy the new written literacy, where those who are not able to use computers are unable to function and perform everyday tasks. The Handbook of Research on Comparative Approaches to the Digital Age Revolution in Europe and the Americas explores the new ways that technology is shaping our society and the advances it is bringing, along with potential drawbacks, such as human jobs being replaced by computers. This expansive handbook is an essential reference source for students, academics, and professionals in the fields of communication, information technology, sociology, social policy, and education; it will also prove of interest to policymakers, funding-agencies, and digital inclusion program developers. This handbook features a broad scope of research-based articles on topics including, but not limited to, computational thinking, e-portfolios, e-citizenship, digital inclusion policies, and information literacy as a form of community empowerment. The main research problem addressed in the book is the one regarding the role that export diversification could play for enhancing economic growth in Colombia, both in terms of new products and new geographic markets. The underlying motivation for centering the analysis on the European Union's market are manifold, reaching from the evident concentration of exports – both in terms of composition and markets- that Colombia still shows, to the small amount of empirical studies analyzing the current status and potentialities of the commercial relations between Colombia and the European Union. 278.1.5 383.1.2 365.899 El turismo en los espacios interiores se ha revelado como un activo para poner en valor los recursos naturales y socioculturales del territorio. El presente libro muestra cómo iniciativas de desarrollo endógeno, vinculadas a nuevos productos turísticos, son dinamizadoras de espacios interiores en España. El estudio incorpora una visión actualizada y ampliada de las dinámicas que se están produciendo en los territorios de interior y cómo el turismo puede contribuir a la dinamización de dichos espacios. Esto se concreta en 12 casos del territorio español que, a partir de productos turísticos innovadores, muestran la capacidad de poner en valor los recursos culturales, patrimoniales y naturales del territorio. En cada una de las zonas se identifica la presencia de un determinado producto turístico que puede contribuir al desarrollo local y permite identificar la evolución del territorio. The new OECD SME and Entrepreneurship Outlook presents the latest trends in performance of small and medium-sized enterprises (SMEs) and provides a comprehensive overview of business conditions and policy frameworks for SMEs and entrepreneurs. This year's edition provides comparative evidence on business dynamism, productivity growth, wage gaps and export trends by firm size across OECD countries and emerging economies. This two-volume collection analyses the evolution of wine production in European regions across the nineteenth and twentieth centuries. France and Italy in particular have shaped modern viticulture, by improving oenological methods and knowledge, then disseminating them internationally. This first volume looks closely at the development of winegrowing, with cases ranging from Italian and French regions to smaller producers such as Portugal and Slovenia. Il suo ultimo volume è Identity Issues in the Western Balkans The cases of Albania and Montenegro (Roma, 2019). È coordinatrice del Laboratorio di Progettazione Turistica dell'Università Telematica Pegaso e Presidente dell'Associazione Italiana Insegnanti di Geografia (AIIG), sezione di Avellino. As competition is increasingly taking place on a global scale, tourist destinations must act more like businesses than they have in the past. Development in the tourism sector has often been beset by ambiguities and contradictions and has been the subject of debate across a range of disciplines in terms of its sustainability and level of social commitment. New Governance and Management in Touristic Destinations analyzes the most proper governance model to be implemented to increase the competitiveness of tourist destinations. It also focuses on the need to develop a managerial orientation capable of making the tourism system interact with tourism demand. Covering topics such as electronic word of mouth, gastronomic tourism, and sustainable development, this book is essential for practicing hospitality and tourism managers, professionals in the hospitality and tourism industry, specialists and consultants, government officials, researchers, educators, academicians, and students. The Western Silk Road Roadmap is a summary of work conducted by UNWTO and the Directorate-General for Internal Market, Industry, Entrepreneurship and SMEs (DG Grow) of the European Commission (EC). The work included research into the existing usage of the Silk Road identity, connections between key destinations through tangible and intangible heritage, and the potential of a Western Silk Road tourism brand. Untold Silk Road stories: Armenia, Bulgaria. Greece. Italy, Spain, Turkey, Vikings and the Russian Federation and the Silk Road. Concepts were developed to strengthen the use of such a brand to bring benefits to destinations and two capacity building workshops were held on how to progress from theory to practice in developing the Western Silk Road as a transnational tourism route. This roadmap aims to present a common tourism development plan for the route." Esta publicación ayuda a los no especialistas en PI a entender la conexión que existe entre la PI, el turismo y la cultura. A través de múltiples estudios de caso se ilustra cómo las herramientas de PI existentes y potenciales, en particular el desarrollo de marcas y el derecho de autor, pueden añadir valor a los servicios y productos turísticos. En ella se explica cómo incluir la PI en las políticas turísticas, el desarrollo de productos y la creación de marcas de destino, y cómo se pueden explotar los diferentes derechos de PI para movilizar fondos. 365.915 365.922 Fruit de la col·laboració dels ajuntaments, la Diputació de València i la Universitat de València, al llarg del 2013 s'han organitzat una sèrie de cicles, amb el territori com a tema comú. La varietat de temes abordats, fa que aquesta publicació reculli 42 col·laboracions, agrupades en les següents àrees temàtiques: Economia global, economia local; Territori, organització, governança; Patrimoni cultural, factor de desenvolupament; Turisme, activitat en el territori; Empreses, cooperativisme, empenedoria; Desenvolupament rural, sostenibilitat, polítiques i El riu Túria. Una obra coral que recull participacions del professorat, així com la labor tècnica de la Unitat de Suport del Vicerectorat. Diputació, ajuntaments i Universitat han facilitat que centenars, fins i tot milers de ciutadans, hagen ampliat els seus coneixements i cultura. 365.917 This book analyzes the evolution of Italian viticulture and winemaking from the 1860s to the new Millennium. During this period the Italian wine sector experienced a profound modernization, renovating itself and adapting its products to international trends, progressively building the current excellent reputation of Italian wine in the world market. Using unpublished sources and a vast bibliography, authors highlight the main factors favoring this evolution: public institutional support to viticulture; the birth and the growth of Italian wine entrepreneurship; the improvement in quality of the winemaking processes; the increasing relevance of viticulture and winemaking in Italian agricultural production and export; and the emergence of wine as a cultural product. Una de las disciplinas jurídicas más sensibles a

los cambios sociales es, sin duda, el Derecho de daños que se ve afectado no sólo por los cambios legislativos sino también por los cambios tecnológicos y por los cambios en las sensibilidades sociales. Los cambios tecnológicos influyen en la aparición de nuevas formas de dañar, o de nuevos bienes o facetas de la persona que las nuevas tecnologías permiten dañar de manera más eficaz; porque un mundo cada vez más tecnológico, con una tecnología que cada vez maneja fuerzas más impresionantes, es también, sin duda, un mundo en el que anidan más peligros para la persona que, cuando se convierten en daños efectivos, deben ser reparados. Pero no sólo los cambios tecnológicos inciden en el Derecho de daños. También lo hacen los cambios en la sensibilidad social en virtud de los cuales ciertos bienes, como por ejemplo el medio ambiente, van tomando una importancia que lleva a la jurisprudencia (o al legislador) a buscar mecanismos para su defensa. Los estudios que componen este volumen son independientes unos de otros, pero tienen en común el que responden a la sensibilidad que respecto del derecho de daños se tiene en la actualidad. En ellos podemos ver las materias que hoy día preocupan a la doctrina y sobre las que la jurisprudencia se está pronunciando: muchas de estas materias pueden considerarse relativamente recientes (protección de datos, medio ambiente, protección de consumidores, daños en el ámbito de las relaciones familiares, daños derivados de la robótica e inteligencia artificial, etc.), otras sin poderse considerar plenamente clásicas (aunque ello, claro está, depende de a qué llamemos "clásico") se vienen ya planteando desde hace algunos años pero siguen teniendo plena actualidad (v.b. la responsabilidad sanitaria, o la lesión de los bienes y derechos de la personalidad). En fin: también se incluyen estudios relativos a cuestiones que siendo indudablemente clásicas se ven hoy especialmente renovadas precisamente Colombia has set forth a number of important policy strategies to achieve its clean energy ambitions, including the 2018 Green Growth Policy, the 2019 National Circular Economy Strategy and the 2022 Energy Transition Policy. These strategies all note the role sustainable bioenergy and waste-to-energy can play in supporting decarbonisation objectives. This report looks at the enabling conditions to encourage development of these clean energy solutions and mobilise the necessary finance and investment.
