From crystal expert Judy Hall comes a fascinating book that gives you a personalized, practical and direct experience of the thought-provoking wisdom that crystal exploration has conveyed to thousands throughout the world. Going far beyond a reference guide, Judy Hall's Complete Crystal Workshop is a personal tutor, leading you through the key ideas and concepts of using crystals via inspirational and holistic hands-on exercises and rituals. Features include: - Interactive exercises that will lead you toward a deeper understanding of crystals and help you to develop your relaxation, visualization and intuition skills - Journaling sections that allow you to write your own experiences directly into the book - A step-by-step learning programme that guides you on revision work and more advanced exercises - A CD featuring meditations and inspirational music that will bring you into a receptive state for deeper work Perfect for novice and practised crystal users alike, this holistic, integrated and practical guide is your own personal crystal workshop in a book. This loose-leaf module contains background information, a script for workshop leaders, blackline masters for visuals and handouts and application of learning style and learning-theory and learning-style inventory. This title is part of the Complete Workshop Leader's Handbook ISBN 0-8108-3839-9. Complete proceedings of the 13th European Conference on Research Methodology for Business and Management Studies ECRM 2013 PRINT version Published by Academic Conferences and Publishing International Limited. Level II (Grades 8-10) This loose-leaf module contains background information, a script for workshop leaders, blackline masters for visuals and handouts and application of learning style and learning-theory and learning-style inventory. This title is part of the Complete Workshop Leader's Handbook ISBN 0-8108-3839-9. IFYGL is a program jointly sponsored by Canadian and U.S. National Committee for International Hydrological Decade for coordinated research into the physical, chemical and biological aspects of Lake Ontario to improve our understanding of the Lake and its basin. Since 1969, the prestigious Squaw Valley Community of Writers has helped develop the craft of many who are now household names. Such noted authors as Michael Chabon, Anne Lamott, and Amy Tan have distilled their advice and wisdom from seminars and lectures, and the result is a book that captures the workshop experience of complete submersion in the writing process. Less cost! More features! Bragging rights! Let's face it: Woodworking isn't cheap. Wood and materials alone can cost a small fortune. And well-designed commercial woodworking machines are often so expensive that they are beyond the reach of many home woodworkers. So what's a woodworker to do? Do what Stumpy Nubs does and build your own! In The Homemade Woodshop, James Hamilton, creator of the popular Stumpy Nubs website, shows you how to build woodworking machines for a fraction of the cost of store-bought models--and with more features to boot! You'll discover 12 detailed projects for building precise, durable shop-made machines including: • Sliding-top router table that makes joinery safe and easy • Multi-function downdraft table that combines dust collection with countless workholding applications • Sliding crosscut table that gives your table saw the precision and convenience of a high-end European saw • 24" band saw that offers all of the throat capacity of an industrial model in a size that will fit on a benchtop • Crosscut "super-sled" that allows you to create box joints, splined miters, tenons and more • Table saw workstation that affords you a complete workshop in a 4' x 8' footprint • And 7 more! The projects in this book not only save you money, but they allow you to add more features and, ultimately, greater precision and more versatility to the machines in your shop. And let's face it: Having a shop outfitted with machines that you built yourself is just cool. Part of the Lean Tools for Healthcare series, this user-friendly book will help to improve your understanding of kaizen. It describes exactly what a kaizen event is and details all the phases necessary for implementing continuous improvement practices in your healthcare organization. Kaizen Workshops for Lean Healthcare walks you through the steps of This volume contains the papers accepted for the 4th Workshop on Algorithm Engineering (WAE 2000) held in Saarbrücken, Germany, during 5-8 September 2000, together with the abstract of the invited lecture given by Karsten Weihe. The Workshop on Algorithm Engineering covers research on all aspects of the subject. The goal is to present recent research results and to identify and explore directions for future research. Previous meetings were held in Venice (1997), Saarbrücken (1998), and London (1999). Papers were solicited describing original research in all aspects of algorithm engineering, including: - Development of software repositories and platforms which allow the use of and experimentation with efficient discrete algorithms. - Novel uses of discrete algorithms in other disciplines and the evaluation of algorithms for realistic environments. - Methodological issues including standards in the context of empirical - search on algorithms and data structures. - Methodological issues regarding the process of converting user requirements into efficient algorithmic solutions and implementations. The program committee accepted 16 from a total of 30 submissions. The program committee meeting was conducted electronically. The criteria for selection were originality, quality, and relevance to the subject area of the workshop. Considerable effort was devoted to the evaluation of the submissions and to providing the authors with feedback. Each submission was reviewed by at least four program committee members (assisted by subreferees). A special issue of the ACM Journal of Experimental Algorithmics will be devoted to selected papers from WAE 2000. Minds-on Mathematics explains the core elements of math workshop and provides detailed strategies for implementing the workshop structure, including Lesson Openers that engage students, Minilessons that model thinking and problem solving. Offers advice to teachers on how to conduct writing workshops, providing a rationale for writing workshops, looking at what they have in common across grade levels, and discussing the tone of workshop teaching, getting started with independent writing time, curriculum, focus lessons, assessment and evaluation, and other topics.
