A selection of annotated references to unclassified reports and journal articles that were introduced into the NASA scientific and technical information system and announced in Scientific and technical aerospace reports (STAR) and International aerospace abstracts (IAA). Quality users' guides help photographers get the most from their photo equipment. Magic Lantern Guides have sewn bindings and laminated covers for long life. Softbound. 5 x 7-1/2." Approximately 176 pp., fully illustrated in color and black and white. Film cameras - the bodies themselves - have little to do with image quality. Lenses are far more important to image quality than camera bodies. So, as long as your camera has accurate shutter speeds, aperture settings and metering, the brand you pick doesn't really have much of an effect upon the final image. So, then, it appears the model camera you choose is irrelevant. Well, no. The type of film SLR camera you choose is most important to you as the photographer in features and convenience. Comfort has a lot to do with how good you are as a photographer. What I mean by that is that, you choose a camera that feels comfortable in your hands and becomes an extension of your brain as a photographer. This makes it easier to capture the types of images you want. Here's the authoritative text on the Nikon SLR system, covering the entire line from its introduction in 1959. Describes every body, lens, flash and accessory from Nikon. Over
