Is there life on Mars? This age-old question has prompted many missions to Mars,

with the most recent rover, Curiosity, having safely landed in August 2012 amid a blaze of publicity. This manual covers the development, design and engineering of three generations of Mars rover: Sojourner, which landed in 1997, was the size of a microwave; Spirit and Opportunity, both the size of a shopping cart, followed in 2004; and Curiosity is the size of a car, with a design life of two years. Learn how these machines work as well as what they have found and hope to discover - and look forward to the possibility that humans may yet set foot on the Red Planet. This practical guide gives New Hampshire practitioners quick information on evidence rules and procedures. The first part of the book is a "how-to" guide for presenting evidence. The second explains objections at trial. The third consists of the complete and fully updated text of the Rules of Evidence, practice commentary on each rule and its operation, examples of the rule's application and reporter's notes.
