The Zodiac serial killer claimed the lives of at least five young victims between 1966 and 1974, and mocked the police with telephone calls, taunting letters, and encrypted messages. Thousands of men have been accused; nearly 2,500 have been investigated. Yet the Zodiac has never been identified. This painstakingly researched and meticulously detailed compendium to the Zodiac serial killer case by True Crime author Mark Hewitt presents the crimes and their effects on a community, including the various sides of the many disputed issues within the case. HUNTED: The Zodiac Murders is the true story of America's greatest criminal mystery. This indispensable

companion book is accessible to anyone interested in joining the pursuit, exploring a mystery, or witnessing the police response to an appalling crime spree. Book One, *HUNTED: The Zodiac Murders* tells the amazing true story of a serial killer on the loose. Book Two, *PROFILED, The Zodiac Examined* (2017) examines the evidence and offers a careful, detailed profile of the killer based on the case facts. Book Three, *EXPOSED: The Zodiac Revealed* (2018) narrows down the lengthy list of suspects, and offers startling conclusions. Eleven women went missing over the spring and summer of 1988 in New Bedford, Massachusetts, an old fishing port known as the Whaling City, where Moby Dick, Frederick Douglass, textile mills, and heroin dealing represent just a few of the many threads in the community's diverse fabric. In *Shallow Graves*, investigative reporter Maureen Boyle tells the story of a case that has haunted New England for thirty years. The Crimes: The skeletal remains of nine of the women, aged nineteen to thirty-six, were discovered near highways around New Bedford. Some had clearly been strangled, others were so badly decomposed that police were left to guess how they had died. The Victims: All the missing women had led troubled lives of drug addiction, prostitution, and domestic violence, including Nancy Paiva, whose sister was a hard-working employee of the City of New Bedford, and Debra Greenlaw DeMello, who came from a solidly middle-class family but fell into drugs and abusive relationships. In a bizarre twist, Paiva's clothes were found near DeMello's body. The Investigators: Massachusetts state troopers Maryann Dill and Joseph Gonsalves were the two constants in a complex cast of city, county, and state cops and prosecutors. They knew the victims, the suspects, and the drug-and-crime-riddled streets of New Bedford. They were present at the beginning of the case and they stayed to the bitter end. The Suspects: Kenneth Ponte, a New Bedford attorney and deputy sheriff with an appetite for drugs and prostitutes, landed in the investigative crosshairs from the start. He was indicted by a grand

jury in the murder of one of the victims, but those charges were dropped. Anthony DeGrazia was a loner who appeared to fit the classic serial-killer profile: horrific childhood abuse, charming, charismatic, but prone to bursts of violence. He hunted prostitutes in the city by night and served at a Catholic church by day. Which of these two was the real killer? Or was it someone else entirely? Maureen Boyle first broke the story in 1988 and stayed with it for decades. In *Shallow Graves* she spins a riveting narrative about the crimes, the victims, the hunt for the killers, and the search for justice all played out against the backdrop of an increasingly impoverished community beset by drugs and crime. Drawing on more than one hundred interviews, along with police reports, first-person accounts, and field reporting both during the killings and more recently, *Shallow Graves* brings the reader behind the scenes of the investigation, onto the streets of the city, and into the homes of families still hoping for answers. The #1 New York Times bestselling true crime author presents "a solid, compelling account of that most vicious of criminals, the random serial killer" (Library Journal).

Through the 1970s and 80s, a dangerous serial killer stalked Northern California along Interstate 5. Dubbed the I-5 Strangler, Roger Kibbe was incredibly skilled at staying ahead of investigators as his victim count rose. Even after he was identified, there wasn't enough evidence to charge him with murder. Instead, investigators had to build their murder case over the course of months while Kibbe was locked up on an assault conviction. Drawing on hundreds of hours of exclusive interviews with key investigators, as well as other important figures such as the Kibbe's reclusive wife, #1 New York Times bestselling author Bruce Henderson builds a fascinating portrait of this unrepentant murderer. "Trace Evidence is a gripping, fast-paced account of what it takes to capture and make a winnable case against an elusive serial killer." —Vincent Bugliosi, author of *Helter Skelter* "A masterful job...Lusciously detailed and

immensely readable."—Booklist Includes changes entitled Public bulletin. Presents the story of law enforcement's attempt to capture Randall Woodfield and end his killing spree through California, Oregon, and Washington which claimed at least forty-four lives. In 1974, Dennis Lynn Rader stalked and murdered a family of four in Wichita, Kansas. Since adolescence, he had read about serial killers and imagined becoming one. Soon after killing the family, he murdered a young woman and then another, until he had ten victims. He named himself "B.T.K." (bind, torture, kill) and wrote notes that terrorized the city. He remained on the loose for thirty years. No one who knew him guessed his dark secret. He nearly got away with his crimes, but in 2004, he began to play risky games with the police and made a mistake. When he was arrested, Rader's family, friends, and coworkers were shocked to discover that B.T.K. had been among them, going to work, raising his children, and acting normal. This case stands out both for the brutal treatment of victims and for the ordinary public face that Rader, a church council president, had shown to the outside world. Through jailhouse visits, telephone calls, and written correspondence, Katherine Ramsland worked with Rader himself to analyze the layers of his psyche. Using his drawings, letters, interviews, and Rader's unique codes, she presents in meticulous detail the childhood roots and development of one man's motivation to stalk, torture, and kill. She reveals aspects of the dark motivations of this most famous of living serial killers that have never before been revealed. In this book Katherine Ramsland presents an intelligent, original, and rare glimpse into the making of a serial killer and the potential darkness that lives next door. "Explore the true story of the Jersey Shore's "Thrill Killer.""
-- This text provides an in-depth, scholarly examination of serial murderers and their victims. Supported by extensive data and research, the book profiles some of the most prominent murderers of our time, addressing the highest-profile serial killer type--the sexual predator--as well as a wide variety of other types (male, female, healthcare, and serial killers from outside the U.S.). Author Eric Hickey examines the lives of over 400 serial murderers, analyzing cultural, historical, and religious factors that influence our myths and stereotypes of these individuals. He describes the biological, psychological, and sociological reasons for serial murder and discusses profiling and other law enforcement issues related to the apprehension and disposition of serial killers.

From #1 New York Times bestselling author of *The Stranger Beside Me* comes the terrifying true crime story of a serial killer hiding in plain sight. To his neighbors, Jerry Brudos was a gentle, quiet man whose mild manner sharply contrasted with his awesome physical strength. To his employers, Jerry was an expert electrician, the kind of skilled worker you just don't find anymore. To his wife, Darcie, Jerry was a good husband, and a loving father to their children, despite his increasingly sexual demands on her, and his violent insistence that she never venture into his garage workroom and the giant food freezer there. To the Oregon police, Jerry Brudos was the most

hideously twisted killer they had ever unmasked. And they brought to light what he had done to four young women—and perhaps many more—in the nightmare darkness of his sexual hunger and rage. Finally Jerry Brudos was brought to trial...and then, in a shattering aftermath, his wife was accused as well... After a search of over twenty years, one of America's most elusive serial killers was finally apprehended. Now, read the true story of one man's attempt to go inside the mind of the Green River Killer July 15, 1982: 3 women's strangled bodies were found, caught on the pilings of Washington state's Green River. Before long, the "Green River Killer" would be suspected in at least forty-nine more homicides, with no end in sight. Then the authorities received an unbelievable letter from the infamous serial killer Ted Bundy -- then on Florida's death row -- offering to help catch the Green River Killer. But he would only talk to one man: Robert Keppel, the former homicide detective who had helped track Bundy's cross-county killing spree. Now these conversations are revealed, in which Bundy speculates about the motive and methods of the Green River Killer -- and reveals his own twisted secrets as well. Now, as never before, we look into the face of evil...and into the heart of a killer. From the #1 New York Times bestselling author of *The Stranger Beside Me* comes a true crime story of a serial killer who was sentenced to die—yet lived to murder again....and again.... After committing his first grisly crime, Harvey Louis Carignan beat a death sentence and continued to manipulate, rape, and bludgeon women to death, using want ads to lure his young female victims. And time after time, justice was thwarted by a killer whose twisted legal genius was matched only by his sick savagery. Complete with the testimony of the officers who put him behind bars and the women who barely escaped with their lives, *The Want-Ad Killer* is one of the most shattering and thought-provoking true-crime stories of our time. An extensive encyclopedic reference guide to male and female serial killers from throughout world history. The

World Encyclopedia of Serial Killers is the most comprehensive set of its kind in the history of true crime publishing. Written and compiled by Susan Hall, the four-volume set has more than 1600 entries of male and female serial killers from around the world. Defined by the FBI as a person who murders 3 or more people over a period of time with a hiatus of weeks or months between murders, serial killers have walked among us from the dawn of time as these books will demonstrate. While the entries to these volumes will continue to grow—the FBI estimates that there are at least fifty serial killers operating in the United States at any given time—The World Encyclopedia of Serial Killers is as complete as possible through the end of 2017. The series continues with Volume Two, E-L. The entries include El Loco Luis Alfredo Garavito, Happy Face Killer Keith Hunter Jespersen, Interstate Killer Larry Eyler, Godfather of Matamoros Adolfo de Jesus Constanzo, and Golden State Killer Joseph James DeAngelo. You will find these killers and approximately 350 others in this second book in the series of The World Encyclopedia of Serial Killers. Maranhão Boy Mutilator Francisco das Chagas, Night Stalker Richard Ramirez, Rostov Ripper Andrei Romanovych Chikatilo, and Genesee River Killer Arthur John Shawcross. You will find these killers and approximately 475 others in this third book in the series of *The World Encyclopedia of Serial Killers*. For four centuries, New England has been a cradle of crime and murder—from the Salem witch trials to the modern-day mafia. Nineteenth century New England was the hunting ground of five female serial killers: Jane Toppan, Lydia Sherman, Nellie Webb, Harriet E. Nason, and Sarah Jane Robinson. Female killers are often portrayed as caricatures: Black Widows, Angels of Death, or Femme Fatales. But the real stories of these women are much more complex. In *Pretty Evil New England*, true crime author Sue Coletta tells the story of these five women, from broken childhoods, to first brushes with death, and examines the overwhelming urges that propelled these women to the lives of a combined total of more than one-hundred innocent victims. The murders, investigations, trials, and ultimate verdicts will stun and surprise readers as they live vicariously through the killers and the would-be victims that lived to tell their stories. Starting in the 1950s, Americans eagerly built the planet's largest public work: the 42,795-mile National System of Interstate and Defense Highways. Before the concrete was dry on the new roads, however, a specter began haunting them—the highway killer. He went by many names: the "Hitcher," the "Freeway Killer," the "Killer on the Road," the "I-5 Strangler," and the "Beltway Sniper." Some of these criminals were imagined, but many were real. The nation's murder rate shot up as its expressways were built. America became more violent and more mobile at the same time. *Killer on the Road* tells the entwined stories of America's highways and its highway killers. There's the hot-rodding juvenile delinquent who led the National Guard on a multistate manhunt; the wannabe highway patrolman who murdered hitchhiking coeds; the record promoter who preyed on "ghetto kid

in a city reshaped by freeways; the nondescript married man who stalked the interstates seeking women with car trouble; and the trucker who delivered death with his cargo. Thudding away behind these grisly crime sprees is the story of the interstates—how they were sold, how they were built, how they reshaped the nation, and how they came to equate them with violence. Through the stories of highway killers, we see how the “killer on the road,” like the train robber, the gangster, and the mobster, entered the cast of American outlaws, and how the freeway—conceived as a road to utopia—came to be feared as a highway to hell. A seminal work and examination of the psychopathology of journalism. Using a strange and unprecedented lawsuit by a convicted murderer against the journalist who wrote a book about his crime, Malcolm delves into the always uneasy, sometimes tragic relationship that exists between journalist and subject. Featuring the real-life lawsuit of Jeffrey MacDonald, a convicted murderer, against Joe McGinniss, the author of *Fatal Vision*. In Malcolm's view, neither journalist nor subject can avoid the moral impasse that is built into the journalistic situation. When the text first appeared, as a two-part article in *The New Yorker*, its thesis seemed so radical and its irony so pitiless that journalists across the country reacted as if stung. Her book is a work of journalism as well as an essay on journalism: it at once exemplifies and dissects its subject. In her interviews with the leading and subsidiary characters in the MacDonald-McGinniss case -- the principals, their lawyers, the members of the jury, and the various persons who testified as expert witnesses at the trial -- Malcolm is always aware of herself as a player in a game that, as she points out, she cannot lose. The journalist-subject encounter has always troubled journalists, but never before has it been looked at so unflinchingly and so ruefully. Hovering over the narrative -- and always on the edge of the reader's consciousness -- is the MacDonald murder case itself, which imparts to the book an atmosphere of anxiety and

uncanniness. *The Journalist and the Murderer* derives from and reflects many of the dominant intellectual concerns of our time, and it will have a particular appeal for those who cherish the odd, the center, and the unsolved. For most people, the forensic sciences are something reported on the news when a crime is solved through evidence, or used as a plot twist for television shows. But behind the crime-scene tape and the doors of the morgue is a world never seen by the public. Now famed pathologist and medical examiner Dr. Michael Baden and award-winning writer Marion Roach take readers into the laboratory, above the autopsy table, onto the witness stand and out in the field to show how advances in forensic science can solve crucial questions in a criminal case, often with startling accuracy. Baden and Roach reveal how a key clue to the killer of Nicole Brown Simpson was lost when her body was moved to the morgue, and why the JonBenet Ramsey case can never be solved. They show how no clue is too small to be analyzed and no case too old to be reopened. Full of behind-the-scenes drama and surprising revelations, *Dead Reckoning* is a fascinating look at how forensic science is changing the way we convict the guilty and free the innocent. The saga of the famed mountain man and Indian-hater. The film *Jeremiah Johnson* was based on this work. Volume 13 provides valuable examples of the very type of clinically grounded theorizing that represents progress in self psychology. The opening section of clinical papers encompasses compensatory structures, facilitating responsiveness, repressed memories, mature selfobject experience, shame in the analyst, and the resolution of intersubjective impasses. Two self-psychologically informed approaches to supervision are followed by a section of contemporary exploration of sexuality. Contributions to therapy address transference and countertransference issues in drama therapy, an intersubjective approach to conjoint family therapy, and the subjective worlds of profound abuse survivors. A concluding section of studies in applied

self psychology round out this broad and illuminating survey of the field. A New York Times–bestselling journalist traces a string of unsolved murders—and the botched investigation that let the New Bedford Highway Killer walk away. Over the course of seven months in 1988, eleven women disappeared off the streets of New Bedford, Massachusetts, a gloomy, drug-addled coastal town that was once whaling capital of the world. Nine turned up dead. Two were never found. And the perpetrator remains unknown to this day. How could such a thing happen? How, in what was once one of America’s richest cities, could the authorities let their most vulnerable citizens down this badly? As Carlton Smith, a Pulitzer Prize finalist for his coverage of the Green River Killer case, demonstrates in this riveting account, it was the inability of police officers and politicians alike to set aside their personal agendas that let a psychopath off the hook. In *Killing Season*, Smith takes readers into a close-knit community of working-class men and women, an underworld of prostitution and drug abuse, and the halls of New England law enforcement to tell the story of an epic failure of justice. Robert Keppel explores in unflinching detail the monstrous patterns, sadistic compulsions, and depraved motives of serial killers. From the Lonely Hearts Killer who hunted the most desperate of women in 1950s America to such infamous symbols of evil as Jeffrey Dahmer, Ted Bundy, and John Gacy, these are the cases—horrifying, graphic and unforgettable—that Keppel ingeniously taps to shed light on the darkest corners of the pathological mind. Foreword by Ann Rule. The 4th volume of this comprehensive work features hundreds of serial killers from Sacramento to Soviet Russia—plus numerous unsolved cases. The *World Encyclopedia of Serial Killers* is the most complete reference guide on the subject, featuring more than 1,600 entries about the lives and crimes of serial killers from around the world. Defined by the FBI as a person who murders three or more people with a hiatus of weeks or months between murders, the serial killer has present

unique and terrifying challenges to have walked among us since the dawn of time—a fact this extensive record makes chillingly clear. The series concludes with Volume Four, T-Z. Entries include the Terminator Anatoly Yuriyovych Onoprienko; Trailside Killer David Joseph Carpenter; Vampire of Sacramento Richard Trenton Chase; and the Voroshilovgrad Maniac Zaven Almazyan; plus the unsolved cases of the Adelaide Child Murders; the Axeman of New Orleans; the Chillicothe Killer; the Dead Women of Juarez; the Korea Frog Boy Murders; and the Volga Maniac. The terrifying life of a rampaging Indiana killer is vividly chronicled in this true crime book by the co-authors of *Race to Justice*. Maybe the youngest son of violent criminal named Hoggy Thompson was born a beast. Maybe rage was beaten into him. One thing was certain, by the time he reached manhood, Jerry Thompson was a savage killer. He had no conscience about rape, child molestation, or thrashing a dozen men in a prison fight. Once he got his hands on a gun, any target would do. He didn't leave witnesses. When he terrorized an entire courtroom and threatened to rip deputy prosecutor Larry Sells apart, people wondered if there would ever be a way to stop his viciousness. In *Beast of New Castle*, Sells and co-author Margie Porter take a deep dive into the life and crimes of this unrelenting violent offender, and the desperate quest by law enforcement to stop him for good. The title was first published in 2000: Few areas of criminal activity have sustained such widely held attention as serial murder. This volume charts the complete progress of academic work in this field, detailing the development from the early domination of psychiatric enquiries to the later proliferation of criminal justice studies into the darkest human behaviours. Tells the true story of the author's fight to bring the killer of Patrolman Phillip Cardillo to justice after the New York City police officer was killed inside Harlem's Mosque #7 in 1972 in an all-out assault on the NYPD from the Black Liberation Army. The first volume featuring the most infamous killers throughout

history—from Afghanistan's Abdullah Shah to Kazakh cannibal Nikolai Dzhumagaliev. The set begins with Volume 1: Letters A–D. The entries include Ted Bundy, the Candyman Dean Corll, Angel of Death killer Donald Harvey, the ABC Killer, and the Bodies in the Barrels Murders. You will find these killers and approximately five-hundred others in this first book in the series of The World Encyclopedia of Serial Killers. This unique work of reference traces the origins of the modern laws of warfare from the earliest times to the present day. Relying on written records from as far back as 2400 BCE, and using sources ranging from the Bible to Security Council Resolutions, the author pieces together the history of a subject which is almost as old as civilisation itself. The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them, protecting civilians who are either inadvertently or intentionally caught up between them, and controlling the use of particular classes of weapons that may be used in times of conflict. Thus it is that this work is divided into three substantial parts: Volume 1 on the laws affecting combatants and captives; Volume 2 on civilians; and Volume 3 on the law of arms control. This third volume deals with the question of the control of

weaponry, from the Bronze Age to the Nuclear Age. In doing so, it divides into two parts: namely, conventional weapons and Weapon of Mass Destruction. The examination of the history of arms control of conventional weapons begins with the control of weaponry so one side could achieve a military advantage over another. This pattern, which only began to change centuries after the advent of gunpowder, was later supplemented by ideals to control types of conventional weapons because their impacts upon opposing combatants were inhumane. By the late twentieth century, the concerns over inhumane conventional weapons were being supplemented by concerns over indiscriminate conventional weapons. The focus on indiscriminate weapons, when applied on a mass scale, is the core of the second part of the volume. Weapons of Mass Destruction are primarily weapons of the latter half of the twentieth century. Although both chemical and biological warfare have long historical lineages, it was only after the Second World War that technological developments meant that these weapons could be applied to cause large-scale damage to non-combatants. This is unlike nuclear weapons, which are a truly modern invention. Despite being the newest Weapon of Mass Destruction, they are also the weapons which most international attention has been applied, although the frameworks by which they were contained in the last century, appear inadequate to address the needs of current times. As a work of reference this set of three books is unrivalled, and will be of immediate benefit to scholars and practitioners researching and advising on the laws of warfare. It also tells a story which throws fascinating new light on the history of international law and on the history of war itself. In this classic study, Elliott Leyton challenges the conventional idea of serial murderers as deranged madmen. He explores the twisted – but comprehensible – motives of a half-dozen notorious killers: Edmund Emil Kemper, Theodore Robert Bundy, Albert DeSalvo (“The Boston Strangler”), David Richard Berkowitz (“Son

of Sam"), Mark James Robert Essex, and Charles Starkweather. In the process of describing their crimes Leyton exposes the cold rationality that underlies their apparent pointlessness. The result is startling: a revelatory text on a deeply troubling topic. BOOKER PRIZE NOMINEE • "A taut and darkly funny contemporary noir that moves at lightning speed, it's the wittiest and most fun murder party you've ever been invited to." —MARIE CLAIRE Korede's sister Ayoola is many things: the favorite child, the beautiful one, possibly sociopathic. And now Ayoola's third boyfriend in a row is dead, stabbed through the heart with Ayoola's knife. Korede's practicality is the sisters' saving grace. She knows the best solution for cleaning blood (bleach, bleach, and more bleach), the best way to move a body (wrap it in sheets like a mummy), and she keeps Ayoola from posting pictures to Instagram when she should be mourning a "missing" boyfriend. Not that she gets any credit. Korede has long been in love with a kind, handsome doctor at the hospital where she works. She dreams of the day when he will realize that she's exactly what he needs. But when he asks Korede for Ayoola's phone number, she must reckon with what her sister has become and how far she's willing to go to protect her. True tales of murder in New England, from the colonial period to today, chronicled by a true crime master, New York Times bestselling author, and star of Investigation Discovery's new television show Dark Minds Provides a solid review of the subject, with an accessible, incisive presentation including photos and features unique to this edition. For the first time ever, the explosive truth behind the world's most secret Special Operations organization A top-secret U.S. Army Special Operations unit has been running covert missions all over the world, from leading death squads to the hideout of drug baron Pablo Escobar capturing Saddam Hussein and, in one of the greatest special operations missions of all time, helping to track down al-Qa'eda leader Osama bin Laden. "The Activity," as it became known to

insiders, has achieved near-mythical status, even among the world's Special Operations elite. Hidden from the politicians and the government bean counters, the Activity has been carrying out deniable operations, preparing the way for Delta and SEAL Team Six. Now journalist Michael Smith gets inside this clandestine military team to expose their explosive history and secrets. Smith has spoken to many former members of the Activity and reveals the incredible truth behind the world's most secret Special Operations organization, a unit that is at the forefront of the War on Terror.

To understand the minds of serial killers, a journalist embarks on a disturbing project. Speaking first-hand to convicted serial killers and the psychiatrists and criminologists who study their crimes, she gives a nuanced and troubling report on the personalities and motivations of men who have committed unthinkable crimes. The Encyclopaedia of Serial Killers, Second Edition provides accurate information on hundreds of serial murder cases - from early history to the present. Written in a non-sensational manner, this authoritative encyclopaedia debunks many of the myths surrounding this most notorious of criminal activities. New and updated entries include: Axe Man of New Orleans; BTK Strangler; Jack the Ripper; Ciudad Juarez, Mexico; John Allen Muhammad and Lee Boyd Malvo, the Sniper Killers; Gary Leon Ridgway, the Green River Killer; and Harold Frederick Shipman.

NATIONAL BESTSELLER • A twisting, haunting true-life murder mystery about one of the most monstrous crimes in American history, from the author of *The Lost City of Z*. • **NATIONAL BOOK AWARD FINALIST** In the 1920s, the richest people per capita in the

world were members of the Osage Nation in Oklahoma. After oil was discovered beneath their land, the Osage rode in chauffeured automobiles, built mansions, and sent their children to study in Europe. Then, one by one, the Osage began to be killed off. The family of an Osage woman, Mollie Burkhart, became a prime target. One of her relatives was shot. Another was poisoned. And it was just the beginning, as more and more Osage were dying under mysterious circumstances, and many of those who dared to investigate the killings were themselves murdered. As the death toll rose, the newly created FBI took up the case, and the young director, J. Edgar Hoover, turned to a former Texas Ranger named Tom White to try to unravel the mystery. White put together an undercover team, including a Native American agent who infiltrated the region, and together with the Osage began to expose one of the most chilling conspiracies in American history.
