the longest-running, most-manufactured automobile on a single platform of all time. From 1938 to 2003, more than 21.5 million "Bugs" were assembled, distributed, and sold on nearly every continent in the world. Throughout the Beetle's successful run, many of these cars have been relegated to project car status due to their age or condition. Airkooled Kustoms, a VW restoration shop in Hazel Green, Alabama, brings its expertise in restoring these cars to book form with this all-encompassing compilation. Restoring your Beetle is covered through step-by-step sequences from unbolting that first nut through polishing the paint on your freshly restored Bug. The specialists at Airkooled Kustoms walk you through the proper disassembly methods, restoring versus replacing components, and reassembling your restored Bug, covering everything related to the body, undercarriage, and interior along the way. It's about time a thorough, hands-on restoration book has been authored by authorities who know the Beetle like the back of their hands. With this book, you will have everything you need to bring your old or new VW Beetle project back to life. p.p1 {margin: 0.0px 0.0px 0.0px; font: 12.0px Arial; color: #000000}

An 18th century poem about living a virtuous life and real satisfaction coming from contentment. 4-8 yrs. This book by the National Institutes of Health (Publication 06-4082) and the National Heart, Lung, and Blood Institute provides information and effective ways to work with your diet because what you choose to eat affects your chances of developing high blood pressure, or hypertension (the medical term). Recent studies show that blood pressure can be lowered by following the Dietary Approaches to Stop Hypertension (DASH) eating plan-and by eating less salt, also called sodium. While each step alone lowers blood pressure, the combination of the eating plan and a reduced sodium intake gives the biggest benefit and may help prevent the development of high blood pressure. This book, based on the DASH research findings, tells how to follow the DASH eating plan and reduce the amount of sodium you consume. It offers tips on how to start and stay on the eating plan, as well as a week of menus and some recipes. The menus and recipes are given for two levels of daily sodium consumption-2,300 and 1,500 milligrams per day. Twenty-three hundred milligrams is the highest level considered acceptable by the National High Blood Pressure Education Program. It is also the highest amount recommended for healthy Americans by

the 2005 "U.S. Dietary Guidelines for Americans." The 1,500 milligram level can lower blood pressure further and more recently is the amount recommended by the Institute of Medicine as an adequate intake level and one that most people should try to achieve. The lower your salt intake is, the lower your blood pressure. Studies have found that the DASH menus containing 2,300 milligrams of sodium can lower blood pressure and that an even lower level of sodium, 1,500 milligrams, can further reduce blood pressure. All the menus are lower in sodium than what adults in the United States currently eat-about 4,200 milligrams per day in men and 3,300 milligrams per day in women. Those with high blood pressure and prehypertension may benefit especially from following the DASH eating plan and reducing their sodium intake.

Polo Life: Horses, Sport, 10 and Zen delves into the world of high goal polo through the uniquely situated lenses of former 10-goaler Adam Snow and his wife and veterinarian, Shelley Onderdonk. Together their voices provide unprecedented access into the horse and human dynamics that make the sport tick; their passion, respect,

and commitment for the sport and each other shine through each page. Less polo manual than human interest story, their chapters cover a broad range of topics: there is a horse so good she probably single-handedly altered the trajectory of Adam's career, a farm named after the city where the couple met in college, and a country and polo culture that shaped Adam as a player...and where their luggage was stolen more than once. Adam recounts his childhood obsession with ball sports; Shelley hers with horses. Together, they reveal how sports psychology has been integral to Adam's success, tell behind-the-scenes stories about teammates, grooms and trainers, celebrate their legendary equine partners, and provide an uncensored glimpse into the glamorous international component of the sport from Buenos Aires to Bandar Seri Begawan. The dynamics of maintaining a healthy marriage and family within the framework of a professional athlete's career are also fundamental to Adam and Shelley's polo life. Their prose 'by turns humble, humorous, and inspirational' showcases the sport's enduring appeal. This is one in a series of manuals for car or motorcycle owners.
